1974 Index
Proceedings of the IEEE
Vol. 62

This index covers all items - papers, correspondence, reviews, etc. - that appeared in this periodical during 1974, and items from prior years that were commented upon or corrected in 1974. The index is divided into an Author Index and a Subject Index, both arranged alphabetically.

The *Author Index* contains the primary entry for each item; this entry is listed under the name of the first author and includes coauthor names, title, location of the item, and notice of corrections and comments if any. Cross-references are given from each coauthor name to the name of the corresponding first author. The location of the item is specified by the journal name (abbreviated), year, month, inclusive pages, and microfiche code. [The microfiche code, given in parentheses following the inclusive pages, consists of four characters to be interpreted as follows: the first character identifies the microfiche number within the set of fiches for the issue; the second character identifies the row in which the first frame of the particular item is located; and the last two characters designate the position of that frame within the row.]

The *Subject Index* contains several entries for each item, each consisting of a subject heading, modifying phrase(s), first author's name, and location of the item. For information on coauthors, title, comments and corrections if any, etc., it is necessary to refer to the Author Index. Some generic subject headings are used in this index in addition to the usual technical headings, e.g., *Books* (books reviewed in this periodical), *Bibliographies* (both papers that are bibliographies and any other papers which contain more than 50 references), *Conferences* (technical meetings a substantial number of whose abstracts or papers have appeared in this periodical), and *Special Issues* (issues of this periodical devoted primarily to a specific subject). The Subject Index includes subject cross-references as required by the subject matter.

AUTHOR INDEX

SUBJECT INDEX

A

Accelerator RF systems
microwave applications in high-energy physics experiments at Argonne National Laboratory. *Chang, C. T. M.*, *PROC 74 Jan* 25-32 (1B13)
Ac generators; **cf.** Synchronous generators
Ac motor drives
solid-state control; tutorial review paper. *Schieman, Robert G.*, *PROC 74 Dec* 1643-1660 (1C01)
Ac motor drives; **cf.** Induction motor drives
Ac motors; **cf.** Induction motors
Acoustic detectors
ionospheric response to Rayleigh wave generated by earthquake; tsunami warning system. *Najita, Kautoshi*, *PROC 74 May* 563-567 (1B07)
Acoustic device fabrication
surface-wave devices; planar techniques. *Smith, Henry I.*, *PROC 74 Oct* 1361-1387 (1E01)
Acoustic holography
computer conversion of Fresnel-transform hologram into Fourier-transform hologram. *Aoki, Yoshiano*, *PROC 74 May* 643-644 (2A09)
Acoustic imaging
biomedical diagnosis; real-time system using positively scanning transmitter. *Wang, Keith*, *PROC 74 May* 650-651 (2B02)
Acoustic interferometry
ring interferometers for rotation rate sensing; acoustic surface-wave devices. *Newburgh, Ronald G.*, *PROC 74 Dec* 1621-1628 (1A07)
Acoustic materials
α–HgS; dielectric, elastic, and piezoelectric constants. *Sapriel, J.*, *PROC 73 May* 678-679 (3E12) ♦
Acoustic propagation
moving media; eikonal equation derivation. *Brandstatter, J. J.*, *PROC 74 Mar* 400-401 (2D04)
Acoustic propagation; **cf.** Underwater acoustic propagation
Acoustic resonators; **cf.** Piezoelectric resonators
Acoustic surface-wave convolution
barium titanate; convolution of two 12-MHz contradirected surface waves. *Hollatz, L. C.*, *PROC 74 Apr* 531-532 (2C02)
radar ambiguity function generator using surface-wave convolvers. *Das, P.*, *PROC 74 Dec* 1714-1716 (2A11)
Acoustic surface-wave devices
fabrication techniques. *Smith, Henry I.*, *PROC 74 Oct* 1361-1387 (1E01)
ring interferometers for rotation rate sensing. *Newburgh, Ronald G.*, *PROC 74 Dec* 1621-1628 (1A07)
tutorial paper for electronic systems designers. *Holland, Melvin G.*, *PROC 74 May* 582-611 (1C12)
Acoustic surface-wave filters
materials; temperature-stabilized piezoelectric ceramics $PbTiO_3$, $PbZrO_3$, and $Pb(Mn_{1/3}Nb_{2/3})O_3$. *Tamura, Mitsuo*, *PROC 74 Mar* 416 (2E06)
Acoustic surface-wave materials
filter applications; temperature-stabilized piezoelectric ceramics $PbTiO_3$–$PbZrO_3$ and $Pb(Mn_{1/3}Nb_{2/3})O_3$. *Tamura, Mitsuo*, *PROC 74 Mar* 416 (2E06)
Acoustic surface-wave signal processing
phase scanning of transducer array output by varying phase slope of RF excitations to array. *Tsai, Chen S.*, *PROC 74 Jun* 863-864 (3E04)
Acoustic surface-wave transducer arrays
interdigital transducer arrays; phase scanning by varying phase slope of RF excitations to array. *Tsai, Chen S.*, *PROC 74 Jun* 863-864 (3E04)
Acoustic surface-wave transducers
interdigital transducer apodizing method. *Pookaiyaudom, S.*, *PROC 74 Oct* 1402 (2A14)

♦ Check author entry for later corrections/comments

Acoustic transducers
electroacoustic fields inside linear transducer in terms of volume sources and fields on surface of transducer. *Yaghjian, Arthur D., PROC 74 Jun* 858-859 (3D13)
Acoustic transducers; cf. Acoustic surface-wave transducers; Ultrasonic transducers
Acoustoelectric devices
image sensor whose output is spatial Fourier transform of image. *Kornreich, Philipp G., PROC 74 Aug* 1072-1087 (1C06)
Acoustoelectric effects
ionospheric response to Rayleigh wave generated by earthquake; tsunami warning system. *Najita, Kaualoshi, PROC 74 May* 563-567 (1B07)
Acoustooptic devices
image sensor whose output is spatial Fourier transform of image. *Kornreich, Philipp G., PROC 74 Aug* 1072-1087 (1C06)
Acoustooptic filters
tunable filter using noncollinear interaction in TeO_2. *Uchida, Naoya, PROC 74 Sep* 1279-1280 (2A02)
Acoustooptic materials
α-HgS; dielectric, elastic, and piezoelectric constants. *Sapriel, J., PROC 73 May* 678-679 (3E12) ♦
Active filters
bandpass filter using two resistors and two operational amplifiers; temperature-insensitive Q and gain. *Rao, K. Radhakrishna, PROC 74 Dec* 1713-1714 (2A10)
Active networks
bipolar transistor circuits; transient analysis. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)
Active networks; cf. Distributed-active networks
Active *RC* filters
Butterworth filters with equal-valued passive elements; third-order low-pass filters. *Gopal, Krishna, PROC 74 Jan* 137 (2E06)
delay equalizers; adjustable equalizer using one operational amplifier and twin-T feedback network. *Ogen, Thomas, PROC 73 Feb* 244-245 (2E08) ♦
using three operational amplifiers; various transfer functions obtained by open-circuiting appropriate passive elements. *Cahit, R., PROC 74 Jun* 851-852 (3D06)
Active *RC* networks
distributed low-pass networks; relation of nondominant to dominant pole locations, and of Q of nondominant poles to Q of dominant poles. *Huelsman, L. P., PROC 74 Mar* 403-404 (2D07)
equal-valued-capacitor realization of fourth-order low-pass Butterworth characteristic. *Huelsman, L. P., PROC 74 Dec* 1709 (2A06)
inductance simulation for lossy floating inductor. *Dutta Roy, Sukash C., PROC 74 Apr* 521-523 (2B05)
synthesis; common basis for Darlington passive network synthesis and Szentirmai active network synthesis. *Tuttle, David F., Jr., PROC 74 Oct* 1389-1392 (2A01)
Adaptive modulation
speech coding; adaptive versions of PCM, DPCM, and delta modulation. *Jayant, Nuggehally S., PROC 74 May* 611-632 (1E13)
Adjoint networks
time-domain network sensitivity; row sensitivity and column sensitivity. *Chandrashekar, M., PROC 74 Aug* 1179-1180 (2E05)
Airborne radar; cf. Synthetic-aperture radar
Aircraft landing guidance
GCA radars; history and state of development. *Ward, Harold R., PROC 74 Jun* 705-716 (1D09)
Aircraft navigation; cf. Aircraft landing guidance; Air-traffic control
Air-traffic control radar
clutter problems and performance improvement. *Muehe, Charles E., PROC 74 Jun* 716-723 (1E06)
GCA radars; history and state of development. *Ward, Harold R., PROC 74 Jun* 705-716 (1D09)
Air transportation safety
bird monitoring using radar; detection and identification of birds in flight. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)
Altimeters; cf. Radar altimeters; Satellite altimetry
AM; cf. VSB
Amplifier noise
GaAs IMPATT diodes; noise measure improvement by increasing temperature. *Le Borgne, A., PROC 74 Apr* 535-537 (2C05)
impedance matching for noise reduction. *Nezer, Yishay, PROC 74 Mar* 404-406 (2D08)
Amplifiers
wideband amplification using narrowband amplifiers; sampling technique. *Lathi, B. P., PROC 74 Dec* 1716-1717 (2A13)
Amplifiers; cf. Microwave amplifiers; Parametric amplifiers; Traveling-wave amplifiers
Amplitude modulation; cf. AM
Analog simulation
power system applications. *Krause, Paul C., PROC 74 Jul* 994-1009 (2C08)
Analog transistors
planar device using high-resistivity n-type Si with same operation as vacuum tube. *Momura, Takashi, PROC 74 Sep* 1285-1287 (2A08)
Angular velocity measurement
ring interferometers for rotation rate sensing; acoustic surface-wave and magnetostatic surface-wave devices. *Newburgh, Ronald G., PROC 74 Dec* 1621-1628 (1A07)
Anisotropic media
inhomogeneous wave tracking in anisotropic media. *Shin, Sang-Yun, PROC 74 Nov* 1609-1610 (3C11)
wave-packet propagation in nonhomogeneous anisotropic media with moderate absorption: geometrical optics analysis. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)
Anisotropic media; cf. Plasmas
Antenna array mutual coupling
slit array on parabolic cylindrical surface; ray analysis. *Shapiro, Joseph, PROC 74 Nov* 1482-1492 (2A01)
Antenna arrays; cf. Broadside arrays; Chebyshev arrays; Cylindrical arrays; Nonuniformly spaced arrays; Phased arrays; Slot arrays
Antenna feeds
phased array antennas. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
Antennas; cf. Aperture antennas; Reflector antennas
Antenna transient analysis
phased array scanning transients due to time variation of element phases. *Agrawal, Vishwani D., PROC 74 Jun* 850-851 (3D05)
Aperture antennas
in curved conducting surfaces; geometrical diffraction theory treatment. *Pathak, Prabhakar H., PROC 74 Nov* 1438-1447 (1C04)
non-Gaussian phase errors in excitation; radiation pattern calculation. *Beckmann, Petr, PROC 74 Apr* 532-533 (2C02)
Apollo program
radar mapping of lunar surface and subsurface; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)
Argonne National Laboratory
microwave applications in high-energy physics experiments. *Chang, C. T. M., PROC 74 Jan* 25-32 (1B13)
Arithmetic; cf. Digital arithmetic
Arrays; cf. Antenna arrays
Art
computer graphics as artistic medium. *Csuri, Charles, PROC 74 Apr* 503-515 (2A01)
Asymptotic stability
nonlinear feedback systems; global asymptotic stability. *Sinha, A. S. C., PROC 73 Oct* 1506-1507 (3C12) ♦
Atmospheric propagation
laser-beam propagation in atmospheric turbulence; mutual coherence function. *Fante, Ronald L., PROC 74 Nov* 1604-1605 (2C06)
Atmospheric scattering
electromagnetic waves in turbulent air; phenomenological model. *De Wolf, David A., PROC 74 Nov* 1523-1529 (2C14)
Automated microwave measurements; cf. Computer-aided microwave measurements
Automotive electronics
radar accident avoidance systems. *Grimes, Dale M., PROC 74 Jun* 804-822 (3A01)
Avalanche diode amplifiers; cf. IMPATT amplifiers; TRAPATT amplifiers
Avalanche diode oscillators; cf. IMPATT oscillators; Read diode oscillators; TRAPATT oscillators
Avalanche photodiodes
frequency response of multiplication gain for two-layer diodes. *Pal, B. B., PROC 74 Feb* 285-287 (2F04)
Awards
Nobel Prize for Physics for 1973 to Esaki, Giaever, and Josephson; preface to Nobel Lectures. *Gunn, J. B., PROC 74 Jun* 823-824 (2B06)

B

Balloons; cf. Meteorological balloons
Bandpass filters
active filter using two resistors and two operational amplifiers; temperature-insensitive Q and gain. *Rao, K. Radhakrishna, PROC 74 Dec* 1713-1714 (2A10)
Bandstop filters; cf. Notch filters
BARITT diodes
radiation effects. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)
Barium titanate devices
acoustic surface-wave convolvers. *Hollatz, L. C., PROC 74 Apr* 531-532 (2C02)
Bayes procedures
pulse peak location estimation for Gaussian pulses in Gaussian noise; pdf for amplitude of signal plus noise at point near peak. *Clow, Richard, PROC 74 Jan* 134-136 (2E03)
Beam separation; cf. Particle separators
Bell System
semiconductor device reliability, 1950 to present. *Peck, D. Stewart, PROC 74 Feb* 185-211 (1D01)
Bibliographies
acoustic surface-wave devices. *Holland, Melvin G., PROC 74 May* 582-611 (1C12)
automotive radar. *Grimes, Dale M., PROC 74 Jun* 804-822 (3A01)
CO_2 lasers; CW high-power lasers. *DeMaria, Anthony J., PROC 73 Jun* 731-748 (1E09) ♦
computer-aided power system analysis; analog and hybrid computer applications. *Krause, Paul C., PROC 74 Jul* 994-1009 (2C08)
diffraction theory, asymptotic methods; USSR contributions. *Borovikov, V. A., PROC 74 Nov* 1416-1437 (1A10)
electromagnetic propagation in nonhomogeneous time-varying dispersive media; geometrical optics method. *Kravtsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)
electron-beam semiconductor devices. *Silzars, Aris, PROC 74 Aug* 1119-1158 (2A01)
ELF communications. *Bernstein, Steven L., PROC 74 Mar* 292-312 (1A06)
fabrication of acoustic surface-wave devices and thin-film optical devices. *Smith, Henry I., PROC 74 Oct* 1361-1387 (1E01)
Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
ground-wave propagation over inhomogeneous earth models. *Wait, James R., PROC 74 Aug* 1061-1072 (1B09)
ion-implanted semiconductor devices. *Lee, Don H., PROC 74 Sep* 1241-1257 (1E03)
load-flow calculation methods. *Stott, Brian, PROC 74 Jul* 916-929 (1D12)
meteorological radar. *Smith, Paul L., Jr., PROC 74 Jun* 724-745 (2A01)
microwave plasma chemical phenomena; applications in chemical processing and analytical chemistry. *Wightman, James P., PROC 74 Jan* 4-11 (1A06)
molecular lasers; high-pressure pulsed lasers. *Wood, Obert R., II, PROC 74 Mar* 355-397 (2A01)
multidimensional signals; digital reconstruction from projections. *Mersereau, Russell M., PROC 74 Oct* 1319-1338 (1B01)
negative electron affinity devices. *Martinelli, Ramon U., PROC 74 Oct* 1339-1360 (1C07)

♦ **Check author entry for later corrections/comments**

optical pulse measurements; ultrashort pulses. *Bradley, D. J., PROC 74 Mar* 313-345 (1E13)
optical signal processing. *Vander Lugt, Anthony, PROC 74 Oct* 1300-1319 (1A06)
optical waveguides; thin-film dielectric guides. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
phased array antennas. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
power generation using coal; social costs. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦
power system optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)
power system state estimation. *Schweppe, Fred C., PROC 74 Jul* 972-982 (2A14)
radar detection and identification of birds in flight. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)
radiation effects in transit-time microwave diodes. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)
radiation-induced ionization effects in solids. *Holmes-Siedle, Andrew G., PROC 74 Sep* 1196-1207 (1A14)
radiation-produced defects in electronic materials. *Cheng, Li-Jen, PROC 74 Sep* 1208-1214 (1B12)
remote sensing of earth by microwaves. *Tomiyasu, Kiyo, PROC 74 Jan* 86-92 (2A11)
semiconductor device reliability; factors affecting reliability, testing and screening procedures. *Peattie, C. Gordon, PROC 74 Feb* 149-168 (1A07)
semiconductor device reliability in US Department of Defense. *Vaccaro, Joseph, PROC 74 Feb* 169-184 (1B13)
speech coding; PCM, DPCM, and delta modulation. *Jayant, Nuggehally S., PROC 74 May* 611-632 (1E13)
stability and dichotomy by frequency-domain methods. *Popov, V. M., PROC 74 May* 548-562 (1A06)
synchronous machine modeling. *Dandeno, Paul L., PROC 74 Jul* 941-950 (1F09)
therapeutic applications of electromagnetic power. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)

Biological organ transplants
microwave thawing of deep-frozen canine kidneys; preservation studies. *Rajotte, Raymond V., PROC 74 Jan* 76-85 (2A01)

Biological radiation effects
electromagnetic absorption measurements (285–4000 MHz) using parallel-plate waveguide; rats and brain-phantom prolate spheroidal bodies. *Gandhi, O. P., PROC 74 Aug* 1171-1175 (2D11)
electromagnetic scattering from lossy dielectric cylinders; integral equation methods. *Wu, T. K., PROC 74 Aug* 1167-1168 (2D07)

Biological radiation effects; cf. Radiation therapy

Biological tissues
thermal and electrical properties for diathermy at 27.33 MHz, 915 MHz, and 2450 MHz. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)

Biomedical transducers; cf. Implantable transducers

Biomedical ultrasonics
imaging systems; real-time system using positively scanning transmitter. *Wang, Keith, PROC 74 May* 650-651 (2B02)

Bipolar digital integrated circuits
reliability requirements for telephone equipment applications; specifications of British Post Office. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)

Bipolar–MOS devices
negative resistance characteristics. *Lehovec, Kurt, PROC 74 Aug* 1163-1165 (2D03)

Bipolar transistors
inverted operation; gain–frequency characteristic's dependence on current density. *Szabo, B. A., PROC 74 Jul* 1034-1036 (2F06)
ion implantation; basic features and applications. *Lee, Don H., PROC 74 Sep* 1241-1257 (1E03)
modeling; characteristics generated from device process parameters. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)
radiation effects; hardening techniques. *Gregory, Bob L., PROC 74 Sep* 1264-1273 (1F12)
reliability requirements for underwater telephone cable repeater applications; life validation tests. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)
second breakdown; regions of intrinsic ionization in center of emitter and along its entire length. *Krishna, Surinder, PROC 74 Aug* 1182-1183 (2E08)

Birds
radar detection and identification of birds in flight. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)

Brains
electromagnetic absorption measurements (285–4000 MHz) using parallel-plate waveguide; brain-phantom prolate spheroidal bodies. *Gandhi, O. P., PROC 74 Aug* 1171-1175 (2D11)

Breakdown; cf. Gas discharges

Bridges
Wien networks; source impedance compensation for tapered and inverted Wien networks. *Ganguly, Udaya S., PROC 74 Jan* 136-137 (2E05)

Britain; cf. United Kingdom

Broadside arrays
nonuniformly spaced arrays of dipoles; maximum directivity. *Sahalos, J., PROC 74 Dec* 1706-1708 (2A03)

Buried object detection
computer-controlled tunable RF source for tuning through frequencies of nanosecond pulse spectrum, making CW measurements, and computing synthetic echo. *Robinson, Lloyd A., PROC 74 Jan* 36-44 (1C10)

Bus admittance matrix
network calculations using bus admittance matrix that accounts for frequency dependence of network elements. *Pudiyar, Kallianpur R., PROC 74 Aug* 1181-1182 (2E07)

Butterworth filters; cf. Maximally-flat-amplitude filters

C

Cables; cf. Underwater cables

Cadmium sulfide selenide devices
thin-film transistors using CdS_xSe_{1-x}. *Weng, Tung H., PROC 74 Oct* 1404 (2B02)

Camera tubes; cf. Image sensors

Carbon dioxide lasers
CW high-power lasers; review and bibliography. *DeMaria, Anthony J., PROC 73 Jun* 731-748 (1E09) ♦
high-pressure pulsed lasers; recent developments. *Wood, Obert R., II, PROC 74 Mar* 355-397 (2A01)
photon-drag germanium detectors for CW CO_2 lasers. *Patel, B. S., PROC 74 Jan* 143-144 (2E12)
photon-drag germanium detectors for pulsed CO_2 lasers. *Patel, B. S., PROC 73 Jul* 795-796 (2F02) ♦

Carrier processes; cf. Charge-carrier processes

Carrier tracking loops
second-order loops with arbitrary phase detector characteristic; quasi-stationary analysis for large detuning. *Mancianti, M., PROC 74 Mar* 414-415 (2E04)

Carrier tracking loops; cf. Phase-locked loops

Cavity perturbation techniques
water content determination in crude oil from microwave measurement of permittivity of mixture. *Castle, G. S. Peter, PROC 74 Jan* 103-108 (2B14)

Cavity resonators
mode analysis using Fourier transform method. *Soohoo, Jack, PROC 74 Dec* 1721-1723 (2B04)

Cavity resonators; cf. Resonators

Charge-carrier lifetime
gallium arsenide; measurement of minority carrier lifetime. *Pence, Ira W., Jr., PROC 74 Jul* 1030-1031 (2F02)

Charge-coupled devices
shift registers, 500-bit devices using Al–Al_2O_3–Al metallization; fabrication and operation. *Collins, D. R., PROC 74 Feb* 282-284 (2F01)

Chebyshev arrays
shading coefficients calculation using discrete Fourier transform. *Diderich, Ronald, PROC 74 Oct* 1395-1396 (2A07)
weights calculation using fast Fourier transform. *Nuttall, Albert H., PROC 74 Oct* 1396 (2A08)

Chebyshev filters
sharp-cutoff low-pass filters; pole location calculation. *Dutta Roy, Suhash C., PROC 74 Apr* 520-521 (2B04)

Chemistry
microwave plasmas; chemical phenomena and applications in chemical processing and analytical chemistry. *Wightman, James P., PROC 74 Jan* 4-11 (1A06)

Choppers
induction motor drives; thyristors in secondary side used as PWM dc switch. *Ray, Mita, PROC 74 Oct* 1397 (2A09)

Cinnabar
elastic, piezoelectric, and dielectric constants. *Supriel, J., PROC 73 May* 678-679 (3E12) ♦

Clutter; cf. Radar clutter

Coal
power generation using coal; social costs. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦

Coaxial cables
magnetic slow waves on coaxial line. *Tiem, Dang Hong, PROC 74 Dec* 1723-1724 (2B06)

Codes; cf. Error-correcting codes

Combinational circuits
universal logic modules; *n*-variable modules. *Levan, Tiu, PROC 74 May* 646-648 (2A12)

Communication channels; cf. Quantum communication channels

Communication receivers
radio interference; nonlinear response to multiple inputs. *Bussgang, Julian J., PROC 74 Aug* 1088-1119 (1D08)

Communication receivers; cf. Optical receivers

Communication systems; cf. Digital transmission; ELF communications; Speech transmission; Underwater communications

Comparators
tunnel-diode comparator; 800-MHz operation. *Griffiths, B., PROC 74 May* 639-640 (2A05)

Computer-aided analysis
transcendental function computation by numerically integrating differential equation to which it is a solution. *Shubert, H. A., PROC 74 Jul* 1033-1034 (2F05)

Computer-aided antenna design
Chebyshev array shading coefficients; calculation using discrete Fourier transform. *Diderich, Ronald, PROC 74 Oct* 1395-1396 (2A07)
Chebyshev array weights calculation using fast Fourier transform. *Nuttall, Albert H., PROC 74 Oct* 1396 (2A08)

Computer-aided circuit analysis
bipolar transistor circuits; transient analysis. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)

Computer-aided electric field analysis
potential due to arbitrary charge density; use of FFT. *Metz, L. S., PROC 74 Jul* 1031-1032 (2F03)

Computer-aided electromagnetic analysis
cavity mode analysis using Fourier transform method. *Soohoo, Jack, PROC 74 Dec* 1721-1723 (2B04)

Computer-aided microwave measurements
buried object detection and recognition; tuning of RF source through frequencies of nanosecond pulse spectrum, CW measurements, and computation of synthetic echo. *Robinson, Lloyd A., PROC 74 Jan* 36-44 (1C10)
complex dielectric constant and permeability measurement. *Weir, William B., PROC 74 Jan* 33-36 (1C07)

Computer-aided power system analysis
analog and hybrid computer applications. *Krause, Paul C., PROC 74 Jul* 994-1009 (2C08)
diakoptics; basic principles and power system applications. *Happ, Harvey H., PROC 74 Jul* 930-940 (1E12)
interactive computation. *Undrill, John M., PROC 74 Jul* 1009-1018 (2D09)
load-flow calculation methods. *Stott, Brian, PROC 74 Jul* 916-929 (1D12)
planning of generation, transmission, and distribution. *Knight, U. G., PROC 74 Jul* 872-883 (1A10)
special issue, *PROC 74 Jul* 868-1024 (1A06)

♦ **Check author entry for later corrections/comments**

special issue foreword. *Enns, Mark, Guest ed., PROC 74 Jul* 868-871 (1A06)
transient and dynamic stability solution methods. *Adibi, M. M., PROC 74 Jul* 951-958 (1G05)
transient phenomena analysis. *Dommel, Hermann W., PROC 74 Jul* 983-999 (2B11)
Computer-aided power system control
real-time control and monitoring. *Dy Liacco, Tomas E., PROC 74 Jul* 884-891 (1B08)
Computer-aided power system operation
real-time control and monitoring. *Dy Liacco, Tomas E., PROC 74 Jul* 884-891 (1B08)
special issue, *PROC 74 Jul* 868-1024 (1A06)
special issue foreword. *Enns, Mark, Guest ed., PROC 74 Jul* 868-871 (1A06)
Computer arithmetic; **cf.** Digital arithmetic
Computer graphics
artistic expression using computer graphics as medium. *Csuri, Charles, PROC 74 Apr* 503-515 (2A01)
geographical information systems; applications for urban and environmental systems. *Phillips, Richard L., PROC 74 Apr* 437-452 (1B09)
highway design applications. *Moffett, Thurber J., PROC 74 Apr* 429-436 (1B01)
input of three-dimensional data; large-area multiple-pen tablet system. *Sutherland, Ivan E., PROC 74 Apr* 453-461 (1C11)
shaded and colored pictures of three-dimensional objects. *Resch, Ronald D., PROC 74 Apr* 496-502 (1F12)
software; high-level general-purpose device-independent systems. *Newman, William M., PROC 74 Apr* 471-483 (1E01)
special issue, *PROC 74 Apr* 419-518 (1A05)
special issue foreword. *Herzog, Bertram, Guest ed., PROC 74 Apr* 419-420 (1A05)
Western Europe; software, hardware, applications. *Guedj, Richard A., PROC 74 Apr* 421-428 (1A07)
Computer graphics; **cf.** Interactive graphics
Computer languages
human factors design for natural man–machine. *Foley, James D., PROC 74 Apr* 462-471 (1D06)
Computer simulation; **cf.** Analog simulation; Computer-aided ...; Hybrid simulation
Computer software
graphics systems; high-level general-purpose device-independent systems. *Newman, William M., PROC 74 Apr* 471-483 (1E01)
Computer terminals
interactive graphics; intelligent satellites. *van Dam, Andries, PROC 74 Apr* 483-492 (1E13)
Conducting bodies; **cf.** Wedges
Conducting films
silver films; longitudinal-strain coefficient of resistivity. *Singh, Awatar, PROC 74 Apr* 524-526 (2B08)
Conducting materials
millimeter-wave measurement of surface resistance of copper at room temperature; anomalous skin effect. *Tischer, Frederick J., PROC 74 May* 635-636 (2A01)
Conductivity measurement
soil dielectric constant and conductivity as function of soil density, moisture, and excitation frequency from 30 MHz to 4 GHz. *Hipp, Jackie E., PROC 74 Jan* 98-103 (2B09)
Conformal arrays; **cf.** Cylindrical arrays
Contacts; **cf.** Semiconductor device contacts
Continued fractions
conversion to rational functions. *Chen, C. F., PROC 74 May* 636-637 (2A02)
Control system analysis; **cf.** Stability
Control system design; **cf.** Optimal control; Pole assignment
Control systems; **cf.** Distributed systems; Linear systems; Motor drives; Nonlinear systems; Power system control; Time-delay systems
Convolution; **cf.** Acoustic surface-wave convolution
Copper
surface resistance measurements at 35 GHz and room temperature; anomalous skin effect. *Tischer, Frederick J., PROC 74 May* 635-636 (2A01)
Correlators
wide-band cross-correlation with low-frequency multiplier using sampling oscilloscope. *Coekin, J. A., PROC 74 Aug* 1180-1181 (2E06)
Counting circuits
divide-by-*N asynchronous odd-number counters with 50/50 duty cycle; design. Chen, Chun F., PROC 74 Sep* 1278-1279 (2A01)
Coupled-mode analysis
optical thin-film dielectric waveguides. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Crystal oscillators
multivibrator with frequency stability better than 0.0005% between 3- and 12-V supply voltage. *Damljanović, Dragoljub D., PROC 74 May* 640-641 (2A06)
Crystal resonators; **cf.** Piezoelectric resonators
Curve fitting
polynomial fit to sampled-data time series and updated at each new sample point with small memory. *Mengert, Peter, PROC 74 Apr* 543-544 (2C13)
CW lasers
CO_2 high-power lasers; review and bibliography. *DeMaria, Anthony J., PROC 73 Jun* 731-748 (1E09) ♦
Cylinders
electromagnetic scattering of evanescent plane wave; complex ray tracing. *Wang, Wei-Yi D., PROC 74 Nov* 1541-1551 (2E04)
Cylindrical arrays
slit array on parabolic cylindrical surface; ray analysis of mutual coupling. *Shapira, Joseph, PROC 74 Nov* 1482-1492 (2A01)

D

Data transmission; **cf.** Digital transmission
De motor drives
solid-state control; tutorial review paper. *Schieman, Robert G., PROC 74 Dec* 1643-1660 (1C01)
Delay equalizers
adjustable active *RC* equalizer using one operational amplifier and twin-T feedback network. *Ogen, Thomas, PROC 73 Feb* 244-245 (2E08) ♦
Delay filters; **cf.** Delay equalizers
Delta modulation
speech coding; adaptive strategies. *Jayant, Nuggehally S., PROC 74 May* 611-632 (1E13)
Demodulation; **cf.** FM demodulation; Phase-locked loops
Department of Defense; **cf.** US Department of Defense
Diacs
polysilicon n-*n*-n devices; breakover and negative resistance characteristics. *Muñoz, E., PROC 74 Oct* 1394-1395 (2A06)
Diakoptics
basic principles and power system applications. *Happ, Harvey H., PROC 74 Jul* 930-940 (1E12)
Diathermy
27.33 MHz, 915 MHz, and 2450 MHz; biological tissue thermal and electrical properties. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)
Dichotomy theory
stability of nonlinear systems. *Popov, V. M., PROC 74 May* 548-562 (1A06)
Dielectric bodies
electromagnetic scattering from lossy dielectric cylinders; integral equation methods; application to biological tissues. *Wu, T. K., PROC 74 Aug* 1167-1168 (2D07)
Dielectric breakdown; **cf.** Gas discharges
Dielectric constant measurement
microwave barrel resonator for measurement of dielectric rods. *Nagenthiram, P., PROC 74 Nov* 1613-1614 (3D01)
microwave measurement of complex dielectric constant; automated measurement system. *Weir, William B., PROC 74 Jan* 33-36 (1C07)
microwave measurement using active system; sample to be measured incorporated into oscillator, sample properties determined from oscillator frequency and output level. *Ajmera, Ramesh C., PROC 74 Jan* 118-127 (2D01)
soil dielectric constant and conductivity as function of soil density, moisture, and excitation frequency from 30 MHz to 4 GHz. *Hipp, Jackie E., PROC 74 Jan* 98-103 (2B09)
soil moisture monitoring using implanted microwave sensors. *Birchak, J. Robert, PROC 74 Jan* 93-98 (2B04)
water content determination in crude oil from microwave measurement of permittivity of mixture. *Castle, G. S. Peter, PROC 74 Jan* 103-108 (2B14)
Dielectric heating
microwave heating in food industry. *Bengtsson, Nils E., PROC 74 Jan* 44-55 (1D04)
Dielectric heating; **cf.** Diathermy
Dielectric irradiation effects
ionization effects; review of research problems. *Holmes-Siedle, Andrew G., PROC 74 Sep* 1196-1207 (1A14)
photon-induced charge transfer and surface emission. *Barlett, Robert H., PROC 74 Sep* 1215-1220 (1C05)
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)
Dielectric materials; **cf.** Liquid dielectrics
Dielectric waveguides
optical thin-film waveguides; coupled-mode analysis, directional coupling, input–output coupling, modulation, and distributed-feedback laser sources. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Differential PCM; **cf.** DPCM
Diffraction; **cf.** Electromagnetic diffraction; Geometrical diffraction theory
Digital arithmetic
iterative algorithms for function computations. *Levan, D., PROC 74 Jun* 861-862 (3E02)
Digital communications; **cf.** Digital transmission
Digital filters; **cf.** Recursive digital filters
Digital image processing
holography; Fresnel-transform hologram conversion into Fourier-transform hologram. *Aoki, Yoshiano, PROC 74 May* 643-644 (2A09)
reconstruction of multidimensional signals from projections. *Mersereau, Russell M., PROC 74 Oct* 1319-1338 (1B01)
Digital oscillators
limit cycles; oscillators having unique limit cycle independent of initial conditions. *Corinthios, M. J., PROC 74 Jan* 138-139 (2E07)
Digital signal processing; **cf.** Digital image processing; Multidimensional digital signal processing
Digital simulation
highway design using computer graphics. *Moffett, Thurber J., PROC 74 Apr* 429-436 (1B01)
Digital simulation; **cf.** Computer-aided ...
Digital transmission
microwave propagation in rain at 20 GHz; attenuation, cross-polarization discrimination, and error rate. *Yoshikawa, T., PROC 74 Jul* 1036-1037 (2F08)
Nyquist's third criterion for distortionless transmission. *Pasupathy, Subbarayan, PROC 74 Jun* 860-861 (3E01)
packet size optimization. *Hayes, Jeremiah F., PROC 74 Oct* 1397-1398 (2A09)
Digital transmission; **cf.** Delta modulation; PCM
Diode phase shifters
phased array antennas. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
Dipole arrays
nonuniformly spaced broadside arrays; maximum directivity. *Sahalos, J., PROC 74 Dec* 1706-1708 (2A03)
Discrete Fourier transforms
Chebyshev array shading coefficients calculation. *Diderich, Ronald, PROC 74 Oct* 1395-1396 (2A07)
Discrete Fourier transforms; **cf.** Fast Fourier transforms
Discrete orthogonal transforms; **cf.** Discrete Fourier transforms; Fast Fourier transforms; Haar transforms; Slant transforms; Walsh transforms
Discrete-time systems; **cf.** Dyadic-invariant linear systems; Linear time-invariant discrete-time systems; Time-varying linear discrete-time systems
Dispersion
electromagnetic transient propagation in plasmas; finite-difference solution for cold homogeneous lossy isotropic plasmas. *Lam, Dong-Hoa, PROC 74 Dec* 1708-1709 (2A05)
Gaussian pulses as complex-source-point solutions in dispersive media. *Connor, Kenneth A., PROC 74 Nov* 1614-1615 (3D02)

♦ **Check author entry for later corrections/comments**

nonhomogeneous time-varying dispersive media; geometrical optics methods. *Krantsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)
pulse propagation in dispersive media. *Anderson, Dan G., PROC 74 Nov* 1518-1523 (2C09)
pulse propagation in lossy dispersive media; complex space-time ray techniques. *Connor, Kenneth A., PROC 74 Nov* 1586-1598 (2B02)
solitary waves on nonlinear dispersive transmission lines. *Kolodzick, Joseph A., PROC 74 May* 578-581 (1C08)
solitons of TM-type in nonlinear self-focusing media. *Miyagi, Mitsunobu, PROC 74 Sep* 1284-1285 (2A07)
surface-scatter channels; moment characterization of double-spread channels at high Rayleigh parameters. *McDonald, John F., PROC 74 Nov* 1606-1608 (3C08)
wave-packet propagation in nonhomogeneous anisotropic media with moderate absorption; geometrical optics analysis. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)

Display devices
new technologies; applicability, advantages, and disadvantages. *Gordon, Eugene I., PROC 73 Jul* 807-813 (1B09) ♦

Display devices; cf. Electroluminescent display devices; Liquid crystals

Dissipative media; cf. Lossy media

Distortion
signal transmission; Nyquist's third criterion for distortionless transmission. *Pasupathy, Subbarayan, PROC 74 Jun* 860-861 (3E01)

Distributed-active networks
low-pass networks; relation of nondominant to dominant pole locations, and of Q of nondominant poles to Q of dominant poles. *Huelsman, L. P., PROC 74 Mar* 403-404 (2D07)

Distributed-feedback lasers
semiconductor waveguide lasers; transverse mode control. *Somekh, Sasson, PROC 74 Feb* 277-278 (2E10)
thin-film dielectric waveguides; acoustooptic, electrooptic, and magnetooptic modulation. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)

Distributed linear systems
optimal control of time-delay systems with quadratic cost functional. *Kim, M., PROC 74 Aug* 1177-1179 (2E03)

Distributed networks; cf. Nonlinear distributed networks

Distributed *RC* filters
notch filters; voltage-tunable filter suitable for silicon-on-sapphire realization. *Wong, P. H. K., PROC 74 Apr* 523-524 (2B07)

Distributed *RC* networks
active low-pass networks; relation of nondominant to dominant pole locations, and of Q of nondominant poles to Q of dominant poles. *Huelsman, L. P., PROC 74 Mar* 403-404 (2D07)

Doping; cf. Semiconductor doping

Doppler measurements
bird monitoring using radar; detection and identification of birds in flight. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)
ocean surface measurements using HF over-the-horizon radar; wind vector determination. *Ahearn, John J., PROC 74 Jun* 681-687 (1B13)
sea backscatter at HF; characteristics and applications. *Barrick, Donald E., PROC 74 Jun* 673-680 (1B05)

DPCM
abbr. of Differential pulse-code modulation
speech coding; adaptive strategies. *Jayant, Nuggehally S., PROC 74 May* 611-632 (1E13)

Drives; cf. Motor drives

Dyadic Green's functions
longitudinal component; closed-form expression which yields singular quasi-static field. *Howard, Allen Q., Jr., PROC 74 Dec* 1704-1705 (2A01)

Dyadic-invariant linear systems
time-domain analysis; sampled output in response to sampled input. *Cheng, David K., PROC 74 Jul* 1038-1040 (2F10)

Dynamic programming
wave propagation in moving media; eikonal equation derivation for acoustic and electromagnetic cases. *Brandstatter, J. J., PROC 74 Mar* 400-401 (2D04)

E

Earth; cf. Soil analysis

Earth propagation; cf. Ground-wave propagation

Earthquakes
tsunami warning system based on ionospheric response to Rayleigh wave generated by earthquake. *Najita, Kautoshi, PROC 74 May* 563-567 (1B07)

Earth resources mapping
remote sensing of earth by microwaves. *Tomiyasu, Kiyo, PROC 74 Jan* 86-92 (2A11)

Economic analysis
power generation using coal; social costs. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦

Elastic; cf. Acoustic

Electric discharge pumping; cf. Electron-beam pumping; Transversely excited lasers

Electric field calculations
potential due to arbitrary charge density; use of FFT. *Metz, L. S., PROC 74 Jul* 1031-1032 (2F03)

Electric heating; cf. Diathermy; Microwave heating

Electroacoustic transducers; cf. Acoustic transducers

Electrocutaneous stimulation
microwave energy for transcutaneous stimulation of nerve action potentials via implanted microwave diodes. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)

Electroluminescence
liquid dielectrics; pressure dependence of electroluminescence. *Kao, K. C., PROC 74 Jun* 856-858 (2D11)

Electroluminescent diodes; cf. Light-emitting diodes

Electroluminescent display devices
past, present, and future. *Loebner, Egon E., PROC 73 Jul* 837-861 (1E03) ♦

Electromagnetic absorption; cf. Lossy media

Electromagnetic diffraction
asymptotic methods; USSR contributions. *Borovikov, V. A., PROC 74 Nov* 1416-1437 (1A10)
complex ray tracing; scattering of evanescent plane wave by conducting circular cylinder. *Wang, Wei-Yi D., PROC 74 Nov* 1541-1551 (2E04)
fast Fourier transform methods for diffraction problems involving spherically diverging or converging waves. *Sziklas, Edward A., PROC 74 Mar* 410-412 (2D14)
Gaussian beams; inhomogeneous wave tracking analysis. *Choudhary, Satinath, PROC 74 Nov* 1530-1541 (2D07)
high-frequency methods for edges; physical theory of diffraction, geometrical theory of diffraction, and equivalent currents. *Knott, Eugene F., PROC 74 Nov* 1468-1774 (1E06)
special issue on rays and beams, *PROC 74 Nov* 1412-1615 (1A06)
special issue on rays and beams; foreword. *Felsen, Leopold B., Guest ed., PROC 74 Nov* 1412-1415 (1A06)
waveguide discontinuities in open-ended parallel-plate guides; TE mode reflection; ray-optical approach. *Boersma, John, PROC 74 Nov* 1475-1481 (1E13)

Electromagnetic diffraction; cf. Geometrical diffraction theory

Electromagnetic field calculations; cf. Electric field calculations

Electromagnetic interference; cf. Radio interference

Electromagnetic propagation
anisotropic media; inhomogeneous wave tracking. *Shin, Sang-Yun, PROC 74 Nov* 1609-1610 (3C11)
evanescent fields; complex eikonal construction. *Deschamps, Georges A., PROC 74 Nov* 1610-1611 (3C12)
Gaussian beam representation by field of current sources at complex location. *Ito, Michiaki, PROC 74 Nov* 1608 (3C10)
Gaussian beams; inhomogeneous wave tracking analysis. *Choudhary, Satinath, PROC 74 Nov* 1530-1541 (2D07)
moving media; eikonal equation derivation. *Brandstatter, J. J., PROC 74 Mar* 400-401 (2D04)
nonhomogeneous time-varying dispersive media; geometrical optics methods. *Krantsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)
nonlinear waves; asymptotic methods. *Gorschkov, K. A., PROC 74 Nov* 1511-1517 (2C02)
solitons of TM-type in nonlinear self-focusing media. *Miyagi, Mitsunobu, PROC 74 Sep* 1284-1285 (2A07)
special issue on rays and beams, *PROC 74 Nov* 1412-1615 (1A06)
special issue on rays and beams; foreword. *Felsen, Leopold B., Guest ed., PROC 74 Nov* 1412-1415 (1A06)

Electromagnetic propagation; cf. Optical propagation; Radiowave propagation

Electromagnetic propagation in plasmas
Gaussian pulses as complex-source-point solutions in dispersive media. *Connor, Kenneth A., PROC 74 Nov* 1614-1615 (3D02)
transient propagation in cold homogeneous lossy isotropic plasmas; finite-difference solution. *Lam, Dong-Hoa, PROC 74 Dec* 1708-1709 (2A05)
wave-packet propagation in nonhomogenedus anisotropic media with moderate absorption; geometrical optics analysis. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)

Electromagnetic propagation in plasmas; cf. Ionospheric propagation

Electromagnetic pulse generators
Gaussian pulse field generation from impulse-excited fields. *Connor, Kenneth A., PROC 74 Nov* 1614-1615 (3D02)

Electromagnetic pulse propagation
dispersive media. *Anderson, Dan G., PROC 74 Nov* 1518-1523 (2C09)
Gaussian pulses as complex-source-point solutions in dispersive media. *Connor, Kenneth A., PROC 74 Nov* 1614-1615 (3D02)
lossy dispersive media; complex space-time ray techniques. *Connor, Kenneth A., PROC 74 Nov* 1586-1598 (2B02)
nonhomogeneous anisotropic media with moderate absorption; geometrical optics analysis. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)
nonhomogeneous time-varying dispersive media; geometrical optics methods. *Krantsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)

Electromagnetic pulse propagation; cf. Electromagnetic transient propagation

Electromagnetic radiation effects
biological absorption measurements (285–4000 MHz) using parallel-plate waveguide; rats and brain-phantom prolate spheroidal bodies. *Gandhi, O. P., PROC 74 Aug* 1171-1175 (2D11)
biological systems; diathermy and transcutaneous stimulation of nerve action potentials via implanted microwave diodes. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)
biological tissues; scattering from lossy dielectric cylinders, integral equation methods. *Wu, T. K., PROC 74 Aug* 1167-1168 (2D07)

Electromagnetic radiation effects; cf. Photon radiation effects

Electromagnetic reflection
Gaussian beams; inhomogeneous wave tracking analysis. *Choudhary, Satinath, PROC 74 Nov* 1530-1541 (2D07)

Electromagnetic scattering
complex ray tracing; scattering of evanescent plane wave by conducting circular cylinder. *Wang, Wei-Yi D., PROC 74 Nov* 1541-1551 (2E04)
evanescent fields; complex eikonal construction. *Deschamps, Georges A., PROC 74 Nov* 1610-1611 (3C12)
leaky-wave structures; beam scattering by nonuniform structures. *Saad, Abraham, PROC 74 Nov* 1552-1561 (2F01)
lossy dielectric cylinders; integral equation methods; application to biological tissues. *Wu, T. K., PROC 74 Aug* 1167-1168 (2D07)
special issue on rays and beams, *PROC 74 Nov* 1412-1615 (1A06)
special issue on rays and beams; foreword. *Felsen, Leopold B., Guest ed., PROC 74 Nov* 1412-1415 (1A06)
turbulent air; phenomenological model. *De Wolf, David A., PROC 74 Nov* 1523-1529 (2C14)

Electromagnetic scattering; cf. Radar scattering; Sea scatter; Waveguide discontinuities

Electromagnetic sounding
buried object detection and recognition; tuning of RF source through frequencies of nanosecond pulse spectrum, CW measurements, and computation of synthetic echo. *Robinson, Lloyd A., PROC 74 Jan* 36-44 (1C10)

Electromagnetic surface waveguides
lossy guides; finite-element analysis. *McAulay, A. D., PROC 74 Mar* 402-403 (2D06)

Electromagnetic surface-wave propagation; cf. Ground-wave propagation

Electromagnetic surface waves; cf. Magnetostatic surface waves

♦ **Check author entry for later corrections/comments**

Electromagnetic transient analysis; **cf.** Antenna transient analysis
Electromagnetic transient propagation
plasmas; finite-difference solution for propagation in cold homogeneous lossy isotropic plasmas. *Lam, Dong-Hoa, PROC 74 Dec* 1708-1709 (2A05)
Electromagnetic transient propagation; **cf.** Electromagnetic pulse propagation
Electron-beam pumping
molecular lasers; high-pressure pulsed lasers; recent developments. *Wood, Obert R., II, PROC 74 Mar* 355-397 (2A01)
Electron-beam semiconductor devices
basic principles; design, processing, reliability, and applications. *Silzars, Aris, PROC 74 Aug* 1119-1158 (2A01)
Electron emission
photon-induced emission from metals and dielectrics. *Barlett, Robert H., PROC 74 Sep* 1215-1220 (1C05)
Electron emission; **cf.** Negative electron affinity devices
Electron radiation effects
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)
Electrooptic modulation
$LiNbO_3$ modulator for binary fiber-optical communications at 1.06 μ. *Chen, Fang-Shang, PROC 74 Jan* 133-134 (2E02)
thin-film dielectric waveguides. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Electrostriction
Mn–Zn ferrite crystal carrying electric current; deformation due to magnetostriction. *Ogawa, Tomoya, PROC 74 Jan* 140-141 (2E09)
ELF
abbr. of Extremely low frequency
ELF communications
propagation, antennas, transmitters, receivers, modulation/coding. *Bernstein, Steven L., PROC 74 Mar* 292-312 (1A06)
Environmental considerations
computer graphics applications in geographical information systems. *Phillips, Richard L., PROC 74 Apr* 437-452 (1B09)
Environmental pollution
power generation using coal; social costs. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦
Equalizers; **cf.** Delay equalizers
Equiripple filters; **cf.** Chebyshev filters
Error-correcting codes
nonbinary word transmission. *Stirzaker, L. R., PROC 74 Oct* 1399-1400 (2A11)
Estimation
optical fields; average count rate and bandwidth estimation based on instant of occurrence of photoevents of low-level light. *Saleh, Bahaa E. A., PROC 74 Apr* 530-531 (2B14)
Estimation; **cf.** Parameter estimation; Power system state estimation; Smoothing techniques; Spectral estimation
Europe
computer graphics in Western Europe; software, hardware, applications. *Guedj, Richard A., PROC 74 Apr* 421-428 (1A07)
Extrapolation
polynomial fit to sampled-data time series and updated at each new sample point with small memory. *Mengert, Peter, PROC 74 Apr* 543-544 (2C13)

F

Fabrication
acoustic surface-wave devices and thin-film optical devices; planar techniques. *Smith, Henry I., PROC 74 Oct* 1361-1387 (1E01)
Fabrication; **cf.** Semiconductor device fabrication
Fast Fourier transforms
cavity mode analysis using Fourier transform method. *Soohoo, Jack, PROC 74 Dec* 1721-1723 (2B04)
Chebyshev array weights calculation. *Nuttall, Albert H., PROC 74 Oct* 1396 (2A08)
diffraction calculations involving spherically diverging or converging waves. *Sziklas, Edward A., PROC 74 Mar* 410-412 (2D14)
electric field calculations; potential due to arbitrary charge distribution. *Metz, L. S., PROC 74 Jul* 1031-1032 (2F03)
Fast transforms
slant Haar transforms. *Fino, Bernard J., PROC 74 May* 653-654 (2B05)
Feature selection
clustering techniques; feature selection and immediate neighborhood concept in context of clustering techniques. *Dasarathy, Behur V., PROC 74 Apr* 529-530 (2B13)
Ferrite phase shifters
phased array antennas. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
Ferrites; **cf.** Manganese–zinc ferrites
FETs
GaAs FET noise figure in 0.5–4GHz range; effect of source lead inductance on noise figure. *Anastassiou, A., PROC 74 Mar* 406-408 (2D10)
FETs; **cf.** JFETs; MOSFETs
Fiber waveguides
fabrication of low-loss, graded-index fibers having GeO_2–SiO_2 core and SiO_2 cladding; chemical vapor deposition technique. *MacChesney, J. B., PROC 74 Sep* 1280-1281 (2A03)
fabrication of low-loss, graded-index fibers having pure fused SiO_2 cores; chemical vapor deposition technique. *Tasker, G. William, PROC 74 Sep* 1281-1282 (2A04)
mode coupling, externally controlled. *Keck, Donald B., PROC 74 May* 649-650 (2B01)
Field calculations; **cf.** Electric field calculations
Field-effect transistors; **cf.** FETs
Filters; **cf.** Acoustic surface-wave filters; Acoustooptic filters; Active filters; Bandpass filters; Distributed filters; Equalizers; Equiripple filters; Low-pass filters; Maximally-flat-amplitude filters; Notch filters; Tracking filters; Tunable filters
Finite-difference methods
electromagnetic transient propagation in plasmas; cold homogeneous lossy isotropic plasmas. *Lam, Dong-Hoa, PROC 74 Dec* 1708-1709 (2A05)
Finite-element methods
electromagnetic surface wave propagation on lossy waveguides. *McAulay, A. D., PROC 74 Mar* 402-403 (2D06)

♦ **Check author entry for later corrections/comments**

Flip-flops; **cf.** Multivibrators
FM demodulation
dynamic tracking filters; bandwidth limit and threshold extension. *Pardue, B. H., PROC 74 May* 645-646 (2A11)
FM oscillators
wideband three-phase oscillators. *Blaneh, Stephen, PROC 74 Oct* 1406-1408 (2B04)
Food processing industry
microwave heating. *Bengtsson, Nils E., PROC 74 Jan* 44-55 (1D04)
Fossil fuel power stations
social costs of producing electric power from coal. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦
Fourier series
comparison with Walsh series; truncation and roundoff errors. *Blachman, Nelson M., PROC 74 Mar* 346-354 (1E04)
Fourier transforms
data analysis, stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
Fourier transforms; **cf.** Discrete Fourier transforms; Fast Fourier transforms
Frequency converters
Schottky-barrier diodes with barrier height of 0.3 in InAs mixed crystals. *Kajiyama, K., PROC 74 Sep* 1287-1288 (2A10)
Function generators; **cf.** Waveform generators

G

Gallium arsenide
minority carrier lifetime measurement. *Pence, Ira W., Jr., PROC 74 Jul* 1030-1031 (2F02)
Gallium arsenide devices
ion implantation; basic features and applications. *Lee, Don H., PROC 74 Sep* 1241-1257 (1E03)
switches; bistable switch with current drop of 41.5% and switching time of 110 ps. *Izadpanah, S. H., PROC 74 Aug* 1166 (2D06)
Gallium arsenide diodes
IMPATT diodes; noise measure improvement by increasing temperature. *Le Borgne, A., PROC 74 Apr* 535-537 (2C05)
IMPATT diodes with Read-type structure; doping profile effect on efficiency. *Hasegawa, F., PROC 74 May* 641-643 (2A07)
IMPATT oscillators; GaAs double-drift region diodes with p+-p-n-n+ structure; 21 GHz, 1.2 W of CW output power, 15.6% efficiency. *Migitaka, M., PROC 74 Jan* 141-142 (2E10)
Gallium arsenide FETs
noise figure in 0.5–4 GHz range; effect of source lead inductance on noise figure. *Anastassiou, A., PROC 74 Mar* 406-408 (2D10)
Gas-discharge devices
millimeter-wave glow-discharge detectors; optimizing gas composition and pressure. *Farhat, Nabil H., PROC 74 Feb* 279-281 (2E12)
Gas discharges
RF and dc breakdown data display on single graph. *Woo, Richard, PROC 74 Apr* 521 (2B05)
Gas discharges; **cf.** Plasmas
Gas lasers; **cf.** Carbon dioxide lasers; Molecular lasers
Gaussian beams
propagation and diffraction; inhomogeneous wave tracking analysis. *Choudhary, Satinath, PROC 74 Nov* 1530-1541 (2D07)
representation by field of current sources at complex location. *Ito, Michiaki, PROC 74 Nov* 1608 (3C10)
Gaussian signals
generation using operational amplifier circuit. *Nakamura, Shogo, PROC 74 May* 651-653 (2B03)
pulse peak location estimation for Gaussian pulses in Gaussian noise; pdf for amplitude of signal plus noise at point near peak. *Clow, Richard, PROC 74 Jan* 134-136 (2E03)
Generating stations
maintenance scheduling; optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)
Geodesy
Skylab radar altimetry; S-193 experiment. *McGoogan, Joseph T., PROC 74 Jun* 793-803 (2E14)
Geographic mapping
computer graphics applications in urban and environmental information systems. *Phillips, Richard L., PROC 74 Apr* 437-452 (1B09)
Geologic mapping
lunar surface and subsurface mapping using synthetic-aperture radar; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)
Geometrical diffraction theory
apertures in curved conducting surfaces; radiation characteristics. *Pathak, Prabhakar H., PROC 74 Nov* 1438-1447 (1C04)
edge in curved conducting surface. *Kouyoumjian, Robert G., PROC 74 Nov* 1448-1461 (1C14)
Gaussian beam propagation and diffraction; inhomogeneous wave tracking analysis. *Choudhary, Satinath, PROC 74 Nov* 1530-1541 (2D07)
high-frequency diffraction, methods; physical theory of diffraction, geometrical theory of diffraction, and equivalent currents. *Knott, Eugene F., PROC 74 Nov* 1468-1774 (1E06)
reflectors; comparison of integral and geometrical fields from high-frequency paraboloidal and hyperboloidal reflectors. *Rusch, W. V. T., PROC 74 Nov* 1603-1604 (3C05)
slit array on parabolic cylindrical surface; ray analysis of mutual coupling. *Shapira, Joseph, PROC 74 Nov* 1482-1492 (2A01)
special issue on rays and beams, *PROC 74 Nov* 1412-1615 (1A06)
special issue on rays and beams; foreword. *Felsen, Leopold B., Guest ed., PROC 74 Nov* 1412-1415 (1A06)
wedges in media with one and two propagation constants. *Christiansen, Peter L., PROC 74 Nov* 1462-1468 (1D14)
Geometrical optics
complex eikonal construction for evanescent optical fields. *Deschamps, Georges A., PROC 74 Nov* 1610-1611 (3C12)
complex point-eikonal theory for optical resonators; Gaussian systems. *Arnaud, Jacques A., PROC 74 Nov* 1561-1570 (2F10)

complex ray techniques for lossy ionospheric propagation. *Bennett, J. A., PROC 74 Nov* 1577-1585 (3A07)
complex ray tracing; scattering of evanescent plane wave by conducting circular cylinder. *Wang, Wei-Yi D., PROC 74 Nov* 1541-1551 (2E04)
diffraction theory, asymptotic methods; USSR contributions. *Borovikov, V. A., PROC 74 Nov* 1416-1437 (1A10)
Gaussian beam propagation and diffraction; inhomogeneous wave tracking analysis. *Choudhary, Satinath, PROC 74 Nov* 1530-1541 (2D07)
Gaussian beam representation by field of current sources at complex location. *Ito, Michiaki, PROC 74 Nov* 1608 (3C10)
Gaussian pulses as complex-source-point solutions in dispersive media. *Connor, Kenneth A., PROC 74 Nov* 1614-1615 (3D02)
inhomogeneous wave tracking in anisotropic media. *Shin, Sang-Yun, PROC 74 Nov* 1609-1610 (3C11)
modulated-wave propagation in nonhomogeneous time-varying dispersive media. *Kravtsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)
nonlinear wave propagation; asymptotic methods. *Gorschkov, K. A., PROC 74 Nov* 1511-1517 (2C02)
pulse propagation in lossy dispersive media; complex space–time ray techniques. *Connor, Kenneth A., PROC 74 Nov* 1586-1598 (2B02)
reflectors; comparison of integral and geometrical fields from high-frequency paraboloidal and hyperboloidal reflectors. *Rusch, W. V. T., PROC 74 Nov* 1603-1604 (3C05)
slit array on parabolic cylindrical surface; ray analysis of mutual coupling. *Shapira, Joseph, PROC 74 Nov* 1482-1492 (2A01)
special issue on rays and beams, *PROC 74 Nov* 1412-1615 (1A06)
special issue on rays and beams; foreword. *Felsen, Leopold B., Guest ed., PROC 74 Nov* 1412-1415 (1A06)
surface-scatter channels; moment characterization of double-spread channels at high Rayleigh parameters. *McDonald, John F., PROC 74 Nov* 1606-1608 (3C08)
waveguide discontinuities in open-ended parallel-plate guides; TE mode reflection. *Boersma, John, PROC 74 Nov* 1475-1481 (1E13)
wave-packet propagation in nonhomogeneous anisotropic media with moderate absorption. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)

Geometry
interactive graphics for pure mathematics research; 'n-dimensional blackboard'. *Strauss, Charles M., PROC 74 Apr* 493-495 (1F09)

Germanium radiation detectors
infrared detectors; photon-drag detectors for CW CO_2 lasers. *Patel, B. S., PROC 74 Jan* 143-144 (2E12)
infrared detectors; photon-drag detectors for pulsed CO_2 lasers. *Patel, B. S., PROC 73 Jul* 795-796 (2F02) ♦

Germanium transistors
reliability requirements for underwater telephone cable repeater applications; life validation tests. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)

Glow-discharge devices
millimeter-wave detectors; optimizing gas composition and pressure. *Farhat, Nabil H., PROC 74 Feb* 279-281 (2E12)

Graphics; cf. Compuier graphics

Green's functions
longitudinal component of dyadic Green's function. *Howard, Allen Q., Jr., PROC 74 Dec* 1704-1705 (2A01)

Ground transportation
magnetic levitation; comparison between repulsive and attractive systems. *Lee, Shung-Wu, PROC 74 May* 567-577 (1B11)

Ground transportation; cf. Road transportation

Ground-wave propagation
over inhomogeneous earth models; recent analytical investigations. *Wait, James R., PROC 74 Aug* 1061-1072 (1B09)

Gunn diodes
radiation effects. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)
switches; bistable switch with current drop of 41.5% and switching time of 110 ps. *Izadpanah, S. H., PROC 74 Aug* 1166 (2D06)

Gunn oscillators
bias FM sensitivities as function of modulation frequency and external *Q*. *Lazarus, Max J., PROC 74 Dec* 1724 (2B07)
InP planar-type devices; transit-mode oscillations. *Nakamura, Yoshio, PROC 74 Jan* 142-143 (2E11)

H

Haar transforms
slant Haar transforms; relation to slant Walsh transforms; fast algorithm. *Fino, Bernard J., PROC 74 May* 653-654 (2B05)

Hadamard transforms; cf. Walsh transforms

Heating; cf. Electric heating

Helical waveguides
H modes, rigorous derivation; magnetic slow waves on coaxial line. *Tiem, Dang Hong, PROC 74 Dec* 1723-1724 (2B06)

HF
abbr. of High frequency

HF radar
ocean surface measurements using over-the-horizon radar; wind vector determination. *Ahearn, John J., PROC 74 Jun* 681-687 (1B13)
over-the-horizon radar using ionospheric refraction. *Headrick, James M., PROC 74 Jun* 664-673 (1A10)
sea backscatter; characteristics and applications. *Barrick, Donald E., PROC 74 Jun* 673-680 (1B05)

Highways; cf. Road transportation

Hilbert transforms
Poisson transform of Laplace transform of causal function; relation to Hilbert transform of same function. *Hindin, Harvey J., PROC 74 May* 638-639 (2A04)

History
GCA radars. *Ward, Harold R., PROC 74 Jun* 705-716 (1D09)
semiconductor device reliability in Bell System, 1950 to present. *Peck, D. Stewart, PROC 74 Feb* 185-211 (1D01)

Hologram radar
hologram matrix in which *mn* element is scattered field received at *m*th receiving antenna due to *m*th transmitting antenna; application to radar. *Ogura, Hisanao, PROC 73 Jul* 1040-1041 (5C10) ♦
ice profile mapping using hologram matrix radar; ice profiles less than 5-m thick. *Iizuka, Keigo, PROC 74 Dec* 1718-1719 (2B01)

Holography
computer conversion of Fresnel-transform hologram into Fourier-transform hologram. *Aoki, Yoshiano, PROC 74 May* 643-644 (2A09)

Holography; cf. Microwave holography

Human factors
interactive computer graphics; natural man–machine conversation. *Foley, James D., PROC 74 Apr* 462-471 (1D06)

Hybrid simulation
power system applications. *Krause, Paul C., PROC 74 Jul* 994-1009 (2C08)

Hydro-thermal power systems
unit commitment and dispatch; optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)

Hyperboloidal reflector antennas
geometrical and integral fields from high-frequency paraboloidal and hyperboloidal reflectors. *Rusch, W. V. T., PROC 74 Nov* 1603-1604 (3C05)

I

Ice
radar mapping of ice profiles less than 5-m thick; hologram matrix radar. *Iizuka, Keigo, PROC 74 Dec* 1718-1719 (2B01)

Identification; cf. System identification

IGFETs; cf. MOSFETs

Image processing
optical methods; spatial filtering and spectral analysis. *Vander Lugt, Anthony, PROC 74 Oct* 1300-1319 (1A06)

Image processing; cf. Digital image processing

Image sensors
acoustoelectric imager whose output is spatial Fourier transform of image. *Kornreich, Philipp G., PROC 74 Aug* 1072-1087 (1C06)

Imaging systems; cf. Acoustic imaging; Radar imaging

IMPATT amplifiers
GaAs diodes; noise measure improvement by increasing temperature. *Le Borgne, A., PROC 74 Apr* 535-537 (2C05)

IMPATT diodes
ion-implanted *Ka*-band double drift silicon diodes. *Lee, D. H., PROC 74 Jul* 1025-1026 (2E11)
millimeter-wave diodes for 140-GHz range; ion-implanted complementary Si single-drift-region diodes. *Lee, D. H., PROC 74 Sep* 1295-1296 (2B04)
radiation effects. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)

IMPATT oscillators
80-GHz abrupt-junction diodes; optimum junction diameters. *Ohmori, M., PROC 74 Apr* 537-538 (2C07)
bias FM sensitivities as function of modulation frequency and external *Q*. *Lazarus, Max J., PROC 74 Dec* 1724 (2B07)
efficiency limitation in Si diodes due to instability effects. *van Iperen, B. B., PROC 74 Feb* 284-285 (2F03)
GaAs diodes with Read-type structure; doping profile effect on efficiency. *Hasegawa, F., PROC 74 May* 641-643 (2A07)
GaAs double-drift region diodes with p+-p-n-n+ structure; 21 GHz, 1.2 W of CW output power, 15.6% efficiency. *Migitaka, M., PROC 74 Jan* 141-142 (2E10)

Impedance matching
noise reduction in amplifiers by impedance matching. *Nezer, Yishay, PROC 74 Mar* 404-406 (2D08)
pyroelectric detectors; matching to following amplifier. *Southgate, P. D., PROC 74 Apr* 540-541 (2C10)

Implantable transducers
microwave energy for transcutaneous stimulation of nerve action potentials via implanted microwave diodes. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)

IMP satellites
radar observations of IMP-6 at 140,000 km using 430-MHz radar. *Spence, Lee B., PROC 74 Dec* 1717-1718 (2A14)

Indium arsenide devices
Schottky-barrier diodes with barrier height of 0.3 in InAs mixed crystals. *Kajiyama, K., PROC 74 Sep* 1287-1288 (2A10)

Indium phosphide devices
Gunn oscillators; planar-type devices; transit-mode oscillations. *Nakamura, Yoshio, PROC 74 Jan* 142-143 (2E11)

Inductance simulation
lossy floating inductors. *Dutta Roy, Suhash C., PROC 74 Apr* 521-523 (2B05)

Induction motor drives
thyristors in secondary side used as PWM dc switch. *Ray, Mita, PROC 74 Oct* 1397 (2A09)

Induction motors
efficiency computation for three-phase motors. *Mathis, Harold F., PROC 74 Aug* 1171 (2D11)

Infrared detectors
photon-drag germanium detectors for CW CO_2 lasers. *Patel, B. S., PROC 74 Jan* 143-144 (2E12)
photon-drag germanium detectors for pulsed CO_2 lasers. *Patel, B. S., PROC 73 Jul* 795-796 (2F02) ♦
pyroelectric detectors; impedance matching to following amplifier. *Southgate, P. D., PROC 74 Apr* 540-541 (2C10)

Infrared lasers
CO_2 CW high-power lasers; review and bibliography. *DeMaria, Anthony J., PROC 73 Jun* 731-748 (1E09) ♦

Infrared modulation
electrooptic modulator for binary fiber-optical communications at 1.06 μ; $LiNbO_3$ modulator. *Chen, Fang-Shang, PROC 74 Jan* 133-134 (2E02)

Inhomogeneous; cf. Nonhomogeneous

Injection lasers; cf. Semiconductor lasers

Integral equations
electromagnetic scattering from lossy dielectric cylinders. *Wu, T. K., PROC 74 Aug* 1167-1168 (2D07)

Integrated-circuit contacts
silicon metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)

Integrated-circuit fabrication
ion implantation; basic features and applications. *Lee, Don H., PROC 74 Sep* 1241-1257 (1E03)
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)

♦ Check author entry for later corrections/comments

Integrated-circuit reliability
Bell System, 1950 to present. *Peck, D. Stewart, PROC 74 Feb* 185-211 (1D01)
factors affecting reliability, design, and process control factors; testing and screening procedures. *Peattie, C. Gordon, PROC 74 Feb* 149-168 (1A07)
MOS/LSI circuits. *Colbourne, E. Denis, PROC 74 Feb* 244-259 (2C05)
small numbers of highly reliable devices; procurement methods. *Haythornthwaite, Raymond F., PROC 74 Feb* 260-273 (2D07)
telephone equipment components; specifications of British Post Office for bipolar digital circuits and MOS circuits. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)
US Department of Defense; standardization and specification approach. *Vaccaro, Joseph, PROC 74 Feb* 169-184 (1B13)
Integrated circuits
planar analog transistor using high-resistivity n-type Si; same operation as vacuum tube. *Mimura, Takashi, PROC 74 Sep* 1285-1287 (2A08)
Integrated-circuit testing
MOS/LSI circuits. *Colbourne, E. Denis, PROC 74 Feb* 244-259 (2C05)
reliability assurance for small numbers of highly reliable devices. *Haythornthwaite, Raymond F., PROC 74 Feb* 260-273 (2D07)
telephone equipment components; specifications of British Post Office for bipolar digital circuits and MOS circuits. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)
Integrated optics fabrication
planar techniques. *Smith, Henry I., PROC 74 Oct* 1361-1387 (1E01)
Interactive computer systems
power system applications. *Undrill, John M., PROC 74 Jul* 1009-1018 (2D09)
Interactive graphics
human factors design for natural man–machine conversation. *Foley, James D., PROC 74 Apr* 462-471 (1D06)
'*n*-dimensional blackboard' for pure mathematics research. *Strauss, Charles M., PROC 74 Apr* 493-495 (1F09)
remote terminals; intelligent satellites. *van Dam, Andries, PROC 74 Apr* 483-492 (1E13)
Interconnected systems; **cf.** Diakoptics
Interference; **cf.** Radio interference
Interferometers
ring interferometers for rotation rate sensing; acoustic surface-wave and magnetostatic surface-wave devices. *Newburgh, Ronald G., PROC 74 Dec* 1621-1628 (1A07)
Interferometry; **cf.** Radar interferometry
Interpolation
polynomial fit to sampled-data time series and updated at each new sample point with small memory. *Mengert, Peter, PROC 74 Apr* 543-544 (2C13)
Ion-beam applications
silicon metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)
Ion implantation
basic features and applications. *Lee, Don H., PROC 74 Sep* 1241-1257 (1E03)
IMPATT diodes for 140-GHz range; complementary Si single-drift-region diodes. *Lee, D. H., PROC 74 Sep* 1295-1296 (2B04)
IMPATT diodes; silicon double-drift *Ka*-band diodes. *Lee, D. H., PROC 74 Jul* 1025-1026 (2E11)
ZnSe diodes; switching and memory effects in phosphorus-implanted ZnSe. *Shin, Bok-Kyoon, PROC 74 Apr* 538-540 (2C08)
Ionization chambers
microwave discharge chambers. *Chang, C. T. M., PROC 74 Jan* 25-32 (1B13)
Ionized gases; **cf.** Plasmas
Ionospheric measurements
tsunami warning system based on ionospheric response to Rayleigh wave generated by earthquake. *Najita, Kazutoshi, PROC 74 May* 563-567 (1B07)
Ionospheric propagation
absorbing ionosphere; complex ray techniques. *Bennett, J. A., PROC 74 Nov* 1577-1585 (3A07)
radar; HF over-the-horizon radar using ionospheric refraction. *Headrick, James M., PROC 74 Jun* 664-673 (1A10)
Ion radiation effects
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)

J

JFETs
mathematical approximation of characteristics. *Dostál, Jiří, PROC 74 Jun* 855-856 (2D10)
planar analog transistor using high-resistivity n-type Si; same operation as vacuum tube. *Mimura, Takashi, PROC 74 Sep* 1285-1287 (2A08)
Josephson effect
Nobel Lecture for 1973. *Josephson, Brian David, PROC 74 Jun* 838-841 (2C07)
Nobel Prize for Physics for 1973 to Esaki, Giaever, and Josephson; preface to Nobel Lectures. *Gunn, J. B., PROC 74 Jun* 823-824 (2B06)
Junction FETs; **cf.** JFETs

K

Kidneys
thawing of deep-frozen canine kidneys by microwave heating; preservation studies. *Rajotte, Raymond V., PROC 74 Jan* 76-85 (2A01)

L

Landing guidance systems; **cf.** Aircraft landing guidance
Languages; **cf.** Computer languages
Laplace transforms
numerical inversion; construction of Gaussian quadrature rules. *Luvison, Angelo, PROC 74 May* 637-638 (2A03)
Poisson transform of Laplace transform of causal function; relation to Hilbert transform of same function. *Hindin, Harvey J., PROC 74 May* 638-639 (2A04)
Large-scale systems; **cf.** Diakoptics
Laser-beam focusing
turbulent medium effect on focused laser beam. *Fante, Ronald L., PROC 74 Oct* 1400-1402 (2A12)
Laser-beam propagation; **cf.** Optical propagation
Laser pulses
measurement of ultrashort pulses. *Bradley, D. J., PROC 74 Mar* 313-345 (1E13)
Laser resonators
complex point-eikonal theory; Gaussian systems. *Arnaud, Jacques A., PROC 74 Nov* 1561-1570 (2F10)
Lasers; **cf.** Distributed-feedback lasers; Gas lasers; Semiconductor lasers
Layered media; **cf.** Stratified media
LC networks
synthesis; common basis for Darlington passive network synthesis and Szentirmai active network synthesis. *Tuttle, David F., Jr., PROC 74 Oct* 1389-1392 (2A01)
Lead compounds
lead titanate, lead zirconate, lead manganese niobate; acoustic surface-wave filter materials; temperature-stabilized ceramics. *Tamura, Mitsuo, PROC 74 Mar* 416 (2E06)
Leaky-wave structures
beam scattering by nonuniform leaky-wave structures. *Saad, Abraham, PROC 74 Nov* 1552-1561 (2F01)
Levitation; **cf.** Magnetic levitation
Life testing
integrated circuits for telephone equipment; specifications of British Post Office for bipolar digital circuits and MOS circuits. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)
semiconductor devices; thermally accelerated aging technique. *Reynolds, Frederick H., PROC 74 Feb* 212-222 (2A01)
semiconductor devices for underwater telephone cable repeaters. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)
Light; **cf.** Optical
Light-emitting diodes
past, present, and future. *Loebner, Egon E., PROC 73 Jul* 837-861 (1E03) ♦
Limit cycles
digital oscillator having unique limit cycle independent of initial conditions. *Corinthios, M. J., PROC 74 Jan* 138-139 (2E07)
Linear systems; **cf.** Discrete-time systems; Distributed linear systems; Dyadic-invariant linear systems; Time-varying linear systems
Linear time-invariant continuous-time systems
identification of multivariable systems from frequency response. *Shieh, Leang S., PROC 74 Aug* 1169-1171 (2D09)
pole assignment in multivariable systems; number of feedback laws giving desired poles determined. *Marelli, Sergio, PROC 74 Mar* 412-414 (2E02)
Linear time-invariant discrete-time systems
dyadic-invariant systems; sampled output in response to sampled input. *Cheng, David K., PROC 74 Jul* 1038-1040 (2F10)
identification; Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
transition matrix computation. *Taylor, Fred J., PROC 74 Sep* 1294-1295 (2B03)
Liquid-crystal displays
interdigital twisted-nematic displays. *Soref, R. A., PROC 74 Dec* 1710-1711 (2A07)
Liquid dielectrics
electroluminescence; pressure dependence. *Kao, K. C., PROC 74 Jun* 856-858 (2D11)
microwave permittivity measurement for determining water content of crude oil. *Castle, G. S. Peter, PROC 74 Jan* 103-108 (2B14)
Lithium niobate devices
electrooptic modulator for binary fiber-optical communications at 1.06 μ. *Chen, Fang-Shang, PROC 74 Jan* 133-134 (2E02)
Load dispatching
economic dispatch; hydrothermal unit commitment and dispatch; optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)
Load flow analysis
numerical techniques for computer-aided analysis. *Stott, Brian, PROC 74 Jul* 916-929 (1D12)
optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)
security evaluation; calculation of outage effects. *Hong, Le Duc, PROC 74 Oct* 1403-1404 (2B01)
Logic modules
universal logic modules; *n*-variable modules. *Levan, Tiu, PROC 74 May* 646-648 (2A12)
Lorentz transformation
analogy with transmission-line equations. *McCausland, Ian, PROC 74 Oct* 1398-1399 (2A10)
Lossless networks; **cf.** *LC* networks
Lossy media
electromagnetic surface waveguides; finite-element analysis of lossy guides. *McAulay, A. D., PROC 74 Mar* 402-403 (2D06)
electromagnetic transient propagation in plasmas; finite-difference solution for cold homogeneous lossy isotropic plasmas. *Lam, Dong-Hoa, PROC 74 Dec* 1708-1709 (2A05)
ionospheric propagation; complex ray techniques. *Bennett, J. A., PROC 74 Nov* 1577-1585 (3A07)
pulse propagation in lossy dispersive media; complex space–time ray techniques. *Connor, Kenneth A., PROC 74 Nov* 1586-1598 (2B02)
wave-packet propagation in nonhomogeneous anisotropic media with moderate absorption; geometrical optics analysis. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)
Low-pass filters
active *RC* filters; equal-valued-capacitor realization of fourth-order low-pass Butterworth characteristic. *Huelsman, L. P., PROC 74 Dec* 1709 (2A06)
active *RC* realizations with equal-valued passive elements; third-order low-pass Butterworth filters. *Gopal, Krishna, PROC 74 Jan* 137 (2E06)
distributed-active networks; relation of nondominant to dominant pole locations, and of Q of nondominant poles to Q of dominant poles. *Huelsman, L. P., PROC 74 Mar* 403-404 (2D07)
sharp-cutoff filters; pole location calculation for Butterworth and Chebyshev filters. *Dutta Roy, Suhash C., PROC 74 Apr* 520-521 (2B04)
LSA oscillators
radiation effects. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)
LSI
abbr. of Large-scale integration

♦ **Check author entry for later corrections/comments**

MOS circuits; reliability considerations. *Colbourne, E. Denis, PROC 74 Feb* 244-259 (2C05)

Lunar exploration
radar mapping of lunar surface and subsurface; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)

Lyapunov methods
nonlinear feedback systems; global asymptotic stability. *Sinha, A. S. C., PROC 73 Oct* 1506-1507 (3C12) ♦

M

Magnetic levitation
current coils moving over conducting sheet; force calculations; comparison of repulsive and attractive systems for ground transportation applications. *Lee, Shung-Wu, PROC 74 May* 567-577 (1B11)

Magnetic materials; **cf.** Ferrites

Magnetostatic surface-wave devices
ring interferometers for rotation rate sensing. *Newburgh, Ronald G., PROC 74 Dec* 1621-1628 (1A07)

Magnetostatic surface waves
in air gap between adjacent magnetic substrates. *Tsutsumi, Makoto, PROC 74 Apr* 541-542 (2C12)

Magnetostriction
Mn–Zn ferrite crystal carrying electric current. *Ogawa, Tomoya, PROC 74 Jan* 140-141 (2E09)

Maintenance scheduling
generating stations; optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)

Manganese–zinc ferrites
magnetostriction in conducting Mn–Zn ferrite crystal carrying electric current. *Ogawa, Tomoya, PROC 74 Jan* 140-141 (2E09)

Man–machine systems; **cf.** Interactive systems

Matching; **cf.** Impedance matching

Mathematics
interactive graphics for pure mathematics research; '*n*-dimensional blackboard'. *Strauss, Charles M., PROC 74 Apr* 493-495 (1F09)

Matrix inversion
generalized Vandermonde matrix. *Chang, Feng-Cheng, PROC 74 Aug* 1162-1163 (2D02)

Matrix methods
continued fraction inversion. *Chen, C. F., PROC 74 May* 636-637 (2A02)
load flow analysis; evaluation of outage effects. *Hong, Le Duc, PROC 74 Oct* 1403-1404 (2B01)
partial fraction expansions; matrix relating coefficients of numerator of proper rational function to coefficients of partial fraction expansion. *Chang, Feng-Cheng, PROC 74 Aug* 1162-1163 (2D02)

Maximally-flat-amplitude filters
active *RC* filters; equal-valued-capacitor realization of fourth-order low-pass Butterworth characteristic. *Huelsman, L. P., PROC 74 Dec* 1709 (2A06)
active *RC* realizations with equal-valued passive elements; third-order low-pass Butterworth filters. *Gopal, Krishna, PROC 74 Jan* 137 (2E06)
sharp-cutoff low-pass filters; pole location calculation. *Dutta Roy, Suhash C., PROC 74 Apr* 520-521 (2B04)

Measurements; **cf.** Angular velocity measurement; Conductivity measurement; Dielectric constant measurement; Microwave measurements; Millimeter-wave measurements; Moisture measurement; Noise measurement; Ohmmeters; Optical measurement methods; Pulse measurements

Memories; **cf.** Semiconductor memories

Mercuric sulfide
elastic, piezoelectric, and dielectric constants. *Sapriel, J., PROC 73 May* 678-679 (3E12) ♦

Metal-insulator-metal; **cf.** MIM

Metal irradiation effects
photon-induced charge transfer and surface emission. *Barlett, Robert H., PROC 74 Sep* 1215-1220 (1C05)

Metallization
CCD shift registers using Al–Al_2O_3–Al metallization; 500-bit registers. *Collins, D. R., PROC 74 Feb* 282-284 (2F01)
silicon devices; metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)

Meteorological balloons
radar altimeter weighing 160 g and consuming 0.7 W. *Levanon, Nadav, PROC 74 Jun* 784-792 (2E05)

Meteorological effects; **cf.** Rain

Meteorological radar
applications; precipitation detection and mapping, hydrology, atmospheric research. *Smith, Paul L., Jr., PROC 74 Jun* 724-745 (2A01)
HF over-the-horizon radar to measure ocean surface conditions; wind vector determination. *Ahearn, John J., PROC 74 Jun* 681-687 (1B13)

Microstrip circuits
TRAPATT pulse amplifiers for *X*-band. *Ho, P. T., PROC 74 Jul* 1029-1030 (2F01)

Microwave amplifiers; **cf.** IMPATT amplifiers; Parametric amplifiers; TRAPATT amplifiers; Traveling-wave amplifiers

Microwave applications
special issue on applications in industry, science, and medicine. *PROC 74 Jan* 3-132 (1A05)
special issue on applications in industry, science, and medicine; foreword. *Voss, W. A., Geoffrey, Guest ed., PROC 74 Jan* 3 (1A05)

Microwave detectors
MIM diodes; comparison with IN23 diodes. *Pyée, Maurice, PROC 74 Apr* 526-529 (2B10)
Schottky-barrier diodes with barrier height of 0.3 in InAs mixed crystals. *Kajiyama, K., PROC 74 Sep* 1287-1288 (2A10)

Microwave devices
high-energy physics experiments; particle separators, discharge chambers, and polarized proton targets. *Chang, C. T. M., PROC 74 Jan* 25-32 (1B13)

Microwave diodes; **cf.** Microwave amplifiers; Microwave oscillators

Microwave heating
food industry applications. *Bengtsson, Nils E., PROC 74 Jan* 44-55 (1D04)
kidneys; preservation studies on deep-frozen canine kidneys. *Rajotte, Raymond V., PROC 74 Jan* 76-85 (2A01)

Microwave heating; **cf.** Diathermy

Microwave holography
computer conversion of Fresnel-transform hologram into Fourier-transform hologram. *Aoki, Yoshiano, PROC 74 May* 643-644 (2A09)
hologram matrix in which *mn* element is scattered field received at *m*th receiving antenna due to *n*th transmitting antenna; application to radar. *Ogura, Hisanao, PROC 73 Jul* 1040-1041 (5C10) ♦

Microwave measurements
active measuring systems; sample to be measured incorporated into oscillator, sample properties determined from oscillator frequency and output level. *Ajmera, Ramesh C., PROC 74 Jan* 118-127 (2D01)
remote sensing of earth by microwaves. *Tomiyasu, Kiyo, PROC 74 Jan* 86-92 (2A11)
soil moisture monitoring using implanted microwave sensors. *Birchak, J. Robert, PROC 74 Jan* 93-98 (2B04)

Microwave measurements; **cf.** Cavity perturbation techniques; Computer-aided microwave measurements; Conductivity measurements; Dielectric constant measurement; Permeability measurement

Microwave mixers
Schottky-barrier diodes with barrier height of 0.3 in InAs mixed crystals. *Kajiyama, K., PROC 74 Sep* 1287-1288 (2A10)

Microwave oscillators
dielectric constant measuring system; sample to be measured incorporated into oscillator, sample properties determined from oscillator frequency and output level. *Ajmera, Ramesh C., PROC 74 Jan* 118-127 (2D01)
radiation effects in semiconductor diodes; bulk and junction transit-time diodes. *Guimann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)

Microwave oscillators; **cf.** BARITT oscillators; Gunn oscillators; IMPATT oscillators; LSA oscillators; Read diode oscillators; TRAPATT oscillators

Microwave plasma generation
chemistry of microwave plasmas; applications in chemical processing and analytical chemistry. *Wightman, James P., PROC 74 Jan* 4-11 (1A06)
large-volume source; quartz tube surrounded by cylindrical variable-length cavity connected to 2.450-GHz power source. *Asmussen, Jes, Jr., PROC 74 Jan* 109-117 (2C06)

Microwave power transmission
free-space point-to-point transmission; technology and applications. *Brown, William C., PROC 74 Jan* 11-25 (1A13)

Microwave propagation
rain effects on 20-GHz digital transmission; attenuation, cross-polarization discrimination, and error rate. *Yoshikawa, T., PROC 74 Jul* 1036-1037 (2F08)

Microwave radiation effects
biological absorption measurements (285–4000 MHz) using parallel-plate waveguide; rats and brain-phantom prolate spheroidal bodies. *Gandhi, O. P., PROC 74 Aug* 1171-1175 (2D11)
biological systems; diathermy and transcutaneous stimulation of nerve action potentials via implanted microwave diodes. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)

Microwave radiation effects; **cf.** Microwave heating

Microwave radiometry
earth sensing applications. *Tomiyasu, Kiyo, PROC 74 Jan* 86-92 (2A11)

Microwave transistors
GaAs FET noise figure in 0.5–4GHz range; effect of source lead inductance on noise figure. *Anastassiou, A., PROC 74 Mar* 406-408 (2D10)

Military standards
semiconductor device reliability in US Department of Defense. *Vaccaro, Joseph, PROC 74 Feb* 169-184 (1B13)

Millimeter-wave detectors
glow-discharge detectors; optimizing gas composition and pressure. *Farhat, Nabil H., PROC 74 Feb* 279-281 (2E12)

Millimeter-wave devices
IMPATT diodes; ion-implanted *Ka*-band double-drift silicon diodes. *Lee, D. H., PROC 74 Jul* 1025-1026 (2E11)

Millimeter-wave measurements
surface resistance of copper at room temperatures; anomalous skin effect. *Tischer, Frederick J., PROC 74 May* 635-636 (2A01)

Millimeter-wave oscillators
IMPATT diodes; 80-GHz abrupt-junction diodes; optimum junction diameters. *Ohmori, M., PROC 74 Apr* 537-538 (2C07)
IMPATT diodes for 140-GHz range; ion-implanted complementary Si single-drift-region diodes. *Lee, D. H., PROC 74 Sep* 1295-1296 (2B04)

MIM diodes
abbr. of Metal-insulator-metal diodes
microwave detection characteristics; comparison with IN23 diodes. *Pyée, Maurice, PROC 74 Apr* 526-529 (2B10)

Minority carrier lifetime; **cf.** Charge-carrier lifetime

Mixers; **cf.** Microwave mixers

Modeling; **cf.** Power system modeling; Semiconductor device modeling

Modulation; **cf.** Optical modulation; Pulse modulation

Moisture measurement
soil moisture monitoring using implanted microwave sensors. *Birchak, J. Robert, PROC 74 Jan* 93-98 (2B04)

Molecular lasers
high-pressure pulsed lasers; recent developments. *Wood, Obert R., II, PROC 74 Mar* 355-397 (2A01)

Moon; **cf.** Lunar

MOS analog integrated circuits
distributed *RC* notch filters; voltage-tunable filter. *Wong, P. H. K., PROC 74 Apr* 523-524 (2B07)

MOS digital integrated circuits
reliability of LSI circuits. *Colbourne, E. Denis, PROC 74 Feb* 244-259 (2C05)
reliability requirements for telephone equipment applications; specifications of British Post Office. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)

MOSFETs
ion implantation; basic features and applications. *Lee, Dor. H., PROC 74 Sep* 1241-1257 (1E03)
low-frequency noise in HCl-processed MOSFETs. *Cheng, Y. C., PROC 74 Jun* 859-860 (3D14)
negative resistance characteristics of bipolar–MOSFET device. *Lehovec, Kurt, PROC 74 Aug* 1163-1165 (2D03)
radiation effects; hardening techniques. *Gregory, Bob L., PROC 74 Sep* 1264-1273 (1F12)

♦ **Check author entry for later corrections/comments**

thin-film transistors using CdS_xSe_{1-x}. *Weng, Tung H., PROC 74 Oct* 1404 (2B02)
Motor drives
solid-state control of dc and ac drives; tutorial review paper. *Schieman, Robert G., PROC 74 Dec* 1643-1660 (1C01)
Motor drives; **cf.** Induction motor drives
Motors; **cf.** Induction motors
Moving media
eikonal equation for acoustic and electromagnetic cases; dynamic programming approach. *Brandstatter, J. J., PROC 74 Mar* 400-401 (2D04)
electromagnetic modulated-wave propagation. *Kravtsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)
Multidimensional digital signal processing
reconstruction of multidimensional signals from projections. *Mersereau, Russell M., PROC 74 Oct* 1319-1338 (1B01)
Multidimensional digital signal processing; **cf.** Digital image processing
Multipath distortion
radar tracking of low-elevation targets over earth; diffuse scattering theory. *Barton, David K., PROC 74 Jun* 687-704 (1C05)
Multiplexing
acknowledgment for 1973 INTERCON paper on multiplexed channels. *Ward, Richard J., PROC 74 Oct* 1402 (2A14)
Multivariable positive real functions
synthesis algorithm. *Bose, N. K., PROC 74 Nov* 1615-1616 (3D03)
Multivariable systems
identification of linear time-invariant systems from frequency response. *Shieh, Leang S., PROC 74 Aug* 1169-1171 (2D09)
nonlinear systems; Wiener–Volterra analysis. *Bussgang, Julian J., PROC 74 Aug* 1088-1119 (1D08)
pole assignment in linear systems; number of feedback laws giving desired poles increased. *Beghelli, Sergio, PROC 74 Mar* 412-414 (2E02)
Multivibrators
bipolar transistor multivibrators; performance improvement using diodes. *Damljanović, Dragoljub D., PROC 74 Sep* 1291-1292 (2A14)
quartz multivibrator with frequency stability better than 0.0005% between 3-V and 12-V supply voltage. *Damljanović, Dragoljub D., PROC 74 May* 640-641 (2A06)

N

Navigation; **cf.** Aircraft navigation
Negative electron affinity devices
material characteristics and application to devices. *Martinelli, Ramon U., PROC 74 Oct* 1339-1360 (1C07)
Negative-resistance devices
MOSFET–bipolar device. *Lehovec, Kurt, PROC 74 Aug* 1163-1165 (2D03)
polysilicon n-e-n devices; switching characteristics. *Muñoz, E., PROC 74 Oct* 1394-1395 (2A06)
Nervous systems
microwave energy for transcutaneous stimulation of nerve action potentials via implanted microwave diodes. *Guy, Arthur W., PROC 74 Jan* 55-75 (1E01)
Network analysis; **cf.** Sensitivity analysis
Network functions; **cf.** Multivariable network functions
Network noise; **cf.** Amplifier noise
Networks; **cf.** Active networks; Distributed networks; *LC* networks; Nonlinear networks; *RC* networks; Transmission lines
Network synthesis
active and passive network synthesis; common basis for Darlington passive synthesis and Szentirmai active synthesis. *Tuttle, David F., Jr., PROC 74 Oct* 1389-1392 (2A01)
Neutron radiation effects
semiconductor device degradation; hardening techniques. *Gregory, Bob L., PROC 74 Sep* 1264-1273 (1F12)
silicon; majority carrier removal rates and mobility degradation. *Colclaser, Roy A., PROC 74 Sep* 1232-1235 (1D08)
Nobel Prize for Physics, 1973
preface to Nobel Lectures by Esaki, Giaever, and Josephson. *Gunn, J. B., PROC 74 Jun* 823-824 (2B06)
Noise; **cf.** Amplifier noise; Semiconductor noise
Noise measurement
white and 1/*f* noise superimposed on burst noise. *Strasilla, Udo J., PROC 74 Dec* 1711-1713 (2A08)
Nonhomogeneous media
complex eikonal construction for evanescent optical fields. *Deschamps, Georges A., PROC 74 Nov* 1610-1611 (3C12)
electromagnetic ground-wave propagation over inhomogeneous earth models. *Wait, James R., PROC 74 Aug* 1061-1072 (1B09)
wave-packet propagation in nonhomogeneous anisotropic media with moderate absorption; geometrical optics analysis. *Suchy, Kurt, PROC 74 Nov* 1571-1577 (3A01)
Nonlinear continuous-time systems
global asymptotic stability of feedback systems. *Sinha, A. S. C., PROC 73 Oct* 1506-1507 (3C12) ♦
multiple-input response; Wiener–Volterra analysis. *Bussgang, Julian J., PROC 74 Aug* 1088-1119 (1D08)
stability determination from linear system stability analysis; Kalman conjecture. *Fannin, D. Ronald, PROC 74 Apr* 542-543 (2C12)
stability; dichotomy theory. *Popov, V. M., PROC 74 May* 548-562 (1A06)
Nonlinear distributed networks; **cf.** Nonlinear transmission lines
Nonlinear networks
bipolar transistor circuits; transient analysis using numerical Laplace inversion method and piecewise-linear approximation technique. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)
multiple-input response; communication receiver radio interference response. *Bussgang, Julian J., PROC 74 Aug* 1088-1119 (1D08)
Nonlinear networks; **cf.** Nonlinear transmission lines
Nonlinear oscillators; **cf.** Van der Pol oscillators
Nonlinear systems; **cf.** Nonlinear continuous-time systems ,
Nonlinear time-varying systems
stability of systems with periodic coefficients. *Venkatesh, Y. V., PROC 74 Feb* 278-279 (2E11)
Nonlinear transmission lines
solitary waves on nonlinear dispersive transmission lines. *Kolesick, Joseph A., PROC 74 May* 578-581 (1C08)
Nonlinear wave propagation
asymptotic methods. *Gorachkov, K. A., PROC 74 Nov* 1511-1517 (2C02)
solitary waves on nonlinear dispersive transmission lines. *Kolesick, Joseph A., PROC 74 May* 578-581 (1C08)
solitons of TM-type in nonlinear self-focusing media. *Miyagi, Mitsunobu, PROC 74 Sep* 1284-1285 (2A07)
Nonuniformly spaced arrays
broadside arrays of dipoles; maximum directivity. *Sahalos, J., PROC 74 Dec* 1706-1708 (2A03)
general solution using orthogonal method. *Sahalos, J., PROC 74 Sep* 1292-1294 (2B01)
Notch filters
distributed *RC* filters; voltage-tunable filter suitable for silicon-on-sapphire realization. *Wong, P. H. K., PROC 74 Apr* 523-524 (2B07)
Numerical integration
Laplace transform inversion; construction of Gaussian quadrature rules. *Luvison, Angelo, PROC 74 May* 637-638 (2A03)
Numerical methods
load-flow calculation methods. *Stott, Brian, PROC 74 Jul* 916-929 (1D12)
transcendental function computation by numerically integrating differential equation to which it is a solution. *Shubert, H. A., PROC 74 Jul* 1033-1034 (2F05)
Numerical methods; **cf.** Computer-aided ...; Digital arithmetic; Finite-difference methods; Finite-element methods; Integral equations
Nyquist criteria
signal transmission; Nyquist's third criterion for distortionless transmission. *Pasupathy, Subbarayan, PROC 74 Jun* 860-861 (3E01)

O

Oceanography; **cf.** Sea
Ohmmeters
errors due to battery internal resistance. *Blachman, Nelson M., PROC 74 Jul* 1038 (2F10)
Oil
water content determination in crude oil from microwave measurement of permittivity of mixture. *Castle, G. S. Peter, PROC 74 Jan* 103-108 (2B14)
Optical communication channels; **cf.** Quantum communication channels
Optical communications; **cf.** Optical signal detection
Optical components; **cf.** Integrated optics
Optical couplers
thin-film dielectric waveguides; input–output coupling and directional coupling. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Optical detectors; **cf.** Photodetectors
Optical diffraction
fast Fourier transform methods for diffraction problems involving spherically diverging or converging waves. *Sziklas, Edward A., PROC 74 Mar* 410-412 (2D14)
Optical directional couplers
thin-film dielectric waveguides. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Optical filters; **cf.** Acoustooptic filters
Optical measurement methods
pulse measurements; ultrashort optical pulses. *Bradley, D. J., PROC 74 Mar* 313-345 (1E13)
Optical modulation
thin-film dielectric waveguides; acoustooptic, electrooptic, and magnetooptic modulation. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Optical modulation; **cf.** Electrooptic modulation; Infrared modulation
Optical propagation
evanescent fields; complex eikonal construction. *Deschamps, Georges A., PROC 74 Nov* 1610-1611 (3C12)
turbulent media; mutual coherence function of laser beam in atmospheric turbulence. *Fante, Ronald L., PROC 74 Nov* 1604-1605 (2C06)
turbulent medium effect on focused laser beam. *Fante, Ronald L., PROC 74 Oct* 1400-1402 (2A12)
Optical pulses
measurement of ultrashort pulses. *Bradley, D. J., PROC 74 Mar* 313-345 (1E13)
Optical receivers
frequency-compensated photodiode receivers; SNR. *Goranson, R. W., PROC 74 Oct* 1404-1406 (2B02)
Optical resonators
cavity mode analysis using Fourier transform method. *Soohoo, Jack, PROC 74 Dec* 1721-1723 (2B04)
complex point-source eikonal theory; Gaussian systems. *Arnaud, Jacques A., PROC 74 Nov* 1561-1570 (2F10)
ring and 90° roof open resonators; modes and losses. *Checcacci, P. F., PROC 74 Nov* 1611-1613 (3C13)
Optical scattering
leaky-wave structures; beam scattering by nonuniform structures. *Saad, Abraham, PROC 74 Nov* 1552-1561 (2F01)
Optical signal detection
low-level Gaussian light and short observation times; estimations based on instant of occurrence of photoevents. *Saleh, Bahaa E. A., PROC 74 Apr* 530-531 (2B14)
Optical signal processing
basic principles; spatial filtering and spectral analysis. *Vander Lugt, Anthony, PROC 74 Oct* 1300-1319 (1A06)
Optical waveguides
grating guide for integrated optics; plane-wave theory. *Fox, A. J., PROC 74 May* 644-645 (2A10)
Optical waveguides; **cf.** Fiber waveguides; Thin-film waveguides
Optimal control
distributed linear system with time delay; quadratic cost functional. *Kim, M., PROC 74 Aug* 1177-1179 (2E03)
Optimization techniques
power system problems. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)

♦ **Check author entry for later corrections/comments**

Oscillators; **cf.** Digital oscillators; FM oscillators; Microwave oscillators; Millimeter-wave oscillators; Nonlinear oscillators; Relaxation oscillators
Overwater propagation
surface-scatter channels; moment characterization of double-spread channels at high Rayleigh parameters. *McDonald, John F., PROC 74 Nov* 1606-1608 (3C08)

P

Paraboloidal reflector antennas
geometrical and integral fields from high-frequency paraboloidal and hyperboloidal reflectors. *Rusch, W. V. T., PROC 74 Nov* 1603-1604 (3C05)
Parallel-plate waveguides
open-ended parallel-plate guides; TE mode reflection; ray-optical approach. *Boersma, John, PROC 74 Nov* 1475-1481 (1E13)
Parameter estimation
Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
pulse peak location estimation for Gaussian pulses in Gaussian noise; pdf for amplitude of signal plus noise at point near peak. *Clow, Richard, PROC 74 Jan* 134-136 (2E03)
Parameter identification; **cf.** System identification
Parametric amplifiers
traveling-wave amplifiers; pulse saturation. *Schott, A. C., PROC 74 Dec* 1720-1721 (2B03)
Partial fractions
matrix relating coefficients of numerator of proper rational function to coefficients of partial fraction expansion. *Chang, Feng-Cheng, PROC 74 Aug* 1162-1163 (2D02)
Particle detectors; **cf.** Radiation detectors
Particle scattering
polarized proton targets for scattering analysis. *Chang, C. T. M., PROC 74 Jan* 25-32 (1B13)
silicon metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)
Particle separators
microwave separators. *Chang, C. T. M., PROC 74 Jan* 25-32 (1B13)
Pattern classifying techniques
feature selection and immediate neighborhood concept in context of clustering techniques. *Dasarathy, Belur V., PROC 74 Apr* 529-530 (2B13)
Pattern recognition; **cf.** Feature selection
PCM
abbr. of Pulse-code modulation
speech coding; adaptive strategies. *Jayant, Nuggehally S., PROC 74 May* 611-632 (1E13)
Periodic time-varying systems
stability of nonlinear systems. *Venkatesh, Y. V., PROC 74 Feb* 278-279 (2E11)
Permeability measurement
microwave frequencies; automated measurement system. *Weir, William B., PROC 74 Jan* 33-36 (1C07)
Permittivity; **cf.** Dielectric constant
Phased-array radar
frequency spread in echo due to fast scanning. *Arora, R. K., PROC 74 Aug* 1175-1176 (2E01)
Phased arrays
acoustic surface-wave transducer array for phase scanning. *Tsai, Chen S., PROC 74 Jun* 863-864 (3E04)
review paper; element arrays, phase shifters, feed systems. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
spurious frequency components due to fast scanning. *Arora, R. K., PROC 74 Aug* 1175-1176 (2E01)
transient effects due to time variation of element phases. *Agrawal, Vishwani D., PROC 74 Jun* 850-851 (3D05)
Phase-locked loops
phase errors; nonlinear behavior of loops with rapidly varying phase error. *Chen, Chi-Hau, PROC 74 May* 654-656 (2B06)
Phase shifters
phased array antennas. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
Photodetectors; **cf.** Infrared detectors
Photodiode circuits
receivers; SNR of frequency-compensated receivers. *Goranson, R. W., PROC 74 Oct* 1404-1406 (2B02)
Photodiodes; **cf.** Avalanche photodiodes
Photon radiation effects
metals and dielectrics; induced charge transfer and surface emission. *Barlett, Robert H., PROC 74 Sep* 1215-1220 (1C05)
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)
Picture processing; **cf.** Image processing
Piecewise-linear approximation
bipolar transistors; characteristics generated from device process parameters. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)
Piezoelectric materials
acoustic surface-wave filter applications; temperature-stabilized ceramics $PbTiO_3$, $PbZrO_3$, and $Pb(Mn_{1/3}Nb_{2/3})O_3$. *Tamura, Mitsuo, PROC 74 Mar* 416 (2E06)
α–HgS; dielectric, elastic, and piezoelectric constants. *Sapriel, J., PROC 73 May* 678-679 (3E12) ♦
Piezoelectric resonators
high electromagnetic coupling; equivalent circuit. *Onoe, Morio, PROC 74 Oct* 1392-1393 (2A04)
Piezoelectric semiconductor devices; **cf.** Acoustoelectric devices
p-i-n diodes; **cf.** Avalanche photodiodes
Planar arrays
phased arrays; review paper. *Stark, Louis, PROC 74 Dec* 1661-1701 (1D05)
Planar semiconductor devices
analog transistor using high-resistivity n-type silicon; same operation as vacuum tube. *Mimura, Takashi, PROC 74 Sep* 1285-1287 (2A08)
Gunn oscillators of InP; transit-mode oscillations. *Nakamura, Yoshio, PROC 74 Jan* 142-143 (2E11)
Planning; **cf.** Power system planning
Plasma devices; **cf.** Gas-discharge devices
Plasma generation; **cf.** Microwave plasma generation
Plasmas
microwave plasma chemical phenomena; applications in chemical processing and analytical chemistry. *Wightman, James P., PROC 74 Jan* 4-11 (1A06)
rotating electron plasma; constitutive relations. *Shiozawa, Toshiyuki, PROC 74 Sep* 1283-1284 (2A06)
Plasmas; **cf.** Electromagnetic propagation in plasmas; Semiconductor plasmas
Poisson transforms
of Laplace transform of causal function; relation to Hilbert transform of same function. *Hindin, Harvey J., PROC 74 May* 638-639 (2A04)
Pole assignment
linear multivariable systems; number of feedback laws giving desired poles increased. *Beghelli, Sergio, PROC 74 Mar* 412-414 (2E02)
Pollution; **cf.** Environmental pollution
Positive real functions; **cf.** Multivariable positive real functions
Power amplifiers
microstrip TRAPATT pulse amplifiers for *X*-band. *Ho, P. T., PROC 74 Jul* 1029-1030 (2F01)
Power converters
motor drives; solid-state control of dc and ac drives; tutorial review paper. *Schieman, Robert G., PROC 74 Dec* 1643-1660 (1C01)
Power converters, ac-dc
microwave power transmission; free-space point-to-point transmission. *Brown, William C., PROC 74 Jan* 11-25 (1A13)
Power converters, dc-ac
microwave power transmission; free-space point-to-point transmission. *Brown, William C., PROC 74 Jan* 11-25 (1A13)
Power flow analysis; **cf.** Load flow analysis
Power generation
social costs of producing electric power from coal. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦
Power semiconductor devices
electron-beam semiconductor devices. *Silzars, Aris, PROC 74 Aug* 1119-1158 (2A01)
Power system analysis
generating stations; optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)
Power system analysis; **cf.** Computer-aided power system analysis
Power system control; **cf.** Computer-aided power system control
Power system dynamic stability
computer solution methods. *Adibi, M. M., PROC 74 Jul* 951-958 (1G05)
Power system modeling
symmetrical components concept; application to three-phase system modeling. *Chen, Mo-Shing, PROC 74 Jul* 901-915 (1C11)
synchronous machine modeling. *Dandeno, Paul L., PROC 74 Jul* 941-950 (1F09)
Power system monitoring
real-time computer monitoring. *Dy Liacco, Tomas E., PROC 74 Jul* 884-891 (1B08)
Power system operation; **cf.** Computer-aided power system operation
Power system planning
computer applications. *Knight, U. G., PROC 74 Jul* 872-883 (1A10)
optimization techniques. *Sasson, Albert M., PROC 74 Jul* 959-972 (2A01)
Power system security
load flow analysis; evaluation of outage effects. *Hong, Le Duc, PROC 74 Oct* 1403-1404 (2B01)
probability methods for security assessment of operating systems. *Patton, A. D., PROC 74 Jul* 892-901 (1C02)
Power system stability
computation method using bus admittance matrix that accounts for frequency dependence of network elements. *Padiyar, Kalliampur R., PROC 74 Aug* 1181-1182 (2E07)
Power system stability; **cf.** Power system dynamic stability; Power system transient stability
Power system state estimation
on-line static state estimation. *Schweppe, Fred C., PROC 74 Jul* 972-982 (2A14)
Power system transients
digital computer methods for electromagnetic transient analysis. *Dommel, Hermann W., PROC 74 Jul* 983-999 (2B11)
Power system transient stability
computer solution methods. *Adibi, M. M., PROC 74 Jul* 951-958 (1G05)
Power transistors
second breakdown; regions of intrinsic ionization in center of emitter and along its entire length. *Krishna, Surinder, PROC 74 Aug* 1182-1183 (2E08)
Power transmission; **cf.** Load flow analysis; Microwave power transmission
Probability functions
cumulative distribution function computation directly from characteristic function. *Dos Santos, A. F., PROC 74 Apr* 533-534 (2C03)
Probability functions; **cf.** Rayleigh distributions
Programming languages; **cf.** Computer languages
Propagation; **cf.** Acoustic propagation; Electromagnetic propagation; Nonlinear wave propagation; Optical propagation; Radiowave propagation
PSK
abbr. of Phase-shift keying
PSK systems
microwave propagation in rain at 20 GHz; attenuation, cross-polarization discrimination, and error rate. *Yoshikawa, T., PROC 74 Jul* 1036-1037 (2F08)
Public systems; **cf.** Social systems
Pulse amplifiers
microstrip TRAPATT amplifiers for *X*-band. *Ho, P. T., PROC 74 Jul* 1029-1030 (2F01)
Pulse-code modulation; **cf.** PCM
Pulsed lasers
molecular lasers; high-pressure pulsed lasers; recent developments. *Wood, Obert R., II, PROC 74 Mar* 355-397 (2A01)
semiconductor lasers; charge storage under transient forward bias; effect on high-speed pulse modulation of laser. *Lee, T. P., PROC 74 Aug* 1176-1177 (2E02)
Pulsed signals
peak location estimation for Gaussian pulses in Gaussian noise; pdf for amplitude of signal plus noise at point near peak. *Clow, Richard, PROC 74 Jan* 134-136 (2E03)

♦ **Check author entry for later corrections/comments**

Pulse generators
Gaussian pulse field generation from impulse-excited fields. *Connor, Kenneth A., PROC 74 Nov* 1614-1615 (3D02)
high-speed variable repetition rate using step-recovery diode circuits; maximum repetition rate of several gigahertz. *Cookin, J. A., PROC 74 Jun* 852-853 (3D07)
Pulse measurements
optical pulses; ultrashort pulse measurements. *Bradley, D. J., PROC 74 Mar* 313-345 (1E13)
Pulse modulation; **cf.** Delta modulation; PCM
Pulse propagation; **cf.** Electromagnetic pulse propagation
Pumping; **cf.** Electron-beam pumping; Transversely excited lasers
Punchthrough diodes; **cf.** BARITT diodes
Pyroelectric detectors
impedance matching to following amplifier. *Southgate, P. D., PROC 74 Apr* 540-541 (2C10)

Q

Quantum communication channels
capacity of pure-state channels. *Helstrom, Carl W., PROC 74 Jan* 139-140 (2E08)

R

Radar
modern technology and applications; special issue. *PROC 74 Jun* 661-822 (1A07)
modern technology and applications; special issue foreword. *Porcello, Leonard J., Guest ed., PROC 74 Jun* 661-663 (1A07)
Radar; **cf.** HF radar; Hologram radar; Phased-array radar; Space-vehicle radar; Synthetic-aperture radar
Radar altimeters
meteorological balloon altimeter weighing 160 g and consuming 0.7 W. *Lenanon, Nadav, PROC 74 Jun* 784-792 (2E05)
Skylab radar altimetry; S-193 experiment. *McGoogan, Joseph T., PROC 74 Jun* 793-803 (2E14)
Radar applications
automotive radar for accident avoidance systems. *Grimes, Dale M., PROC 74 Jun* 804-822 (3A01)
bird monitoring; detection and identification of birds in flight using coherent and noncoherent radar. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)
Radar applications; **cf.** Air-traffic control radar; Meteorological radar; Radar mapping
Radar astronomy
spacecraft observations; IMP-6 satellite observed at 140,000 km using 430-MHz radar. *Spence, Lee B., PROC 74 Dec* 1717-1718 (2A14)
Radar clutter
air-traffic control radar. *Muche, Charles E., PROC 74 Jun* 716-723 (1E06)
birds; detection and identification of birds in flight using coherent and noncoherent radars. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)
Radar imaging
angular resolution; dependence on sidelobe level and target separation. *Steinberg, Bernard D., PROC 74 Jun* 758-762 (2C07)
coherent radar images of extended targets; factors affecting image quality. *Mitchell, Richard L., PROC 74 Jun* 754-758 (2C03)
Radar interferometry
topographic mapping using synthetic-aperture radar with radar interferometry. *Graham, Leroy C., PROC 74 Jun* 763-768 (2C12)
Radar mapping
angular resolution; dependence on sidelobe level and target separation. *Steinberg, Bernard D., PROC 74 Jun* 758-762 (2C07)
angular resolution in conventional and synthetic aperture radar; dependence on sidelobe level. *Steinberg, Bernard D., PROC 74 Apr* 519-520 (2B03)
earth sensing applications. *Tomiyasu, Kiyo, PROC 74 Jan* 86-92 (2A11)
ice profiles less than 5-m thick; hologram matrix radar. *Iizuka, Keigo, PROC 74 Dec* 1718-1719 (2B01)
lunar surface and subsurface mapping using synthetic-aperture radar; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)
ocean surface measurements using HF over-the-horizon radar; wind vector determination. *Ahearn, John J., PROC 74 Jun* 681-687 (1B13)
Skylab radar altimetry; S-193 experiment. *McGoogan, Joseph T., PROC 74 Jun* 793-803 (2E14)
topographic mapping using synthetic-aperture radar with radar interferometry. *Graham, Leroy C., PROC 74 Jun* 763-768 (2C12)
Radar mapping; **cf.** Radar imaging
Radar navigation; **cf.** Air-traffic control radar
Radar resolution
ambiguity function generator using acoustic surface-wave convolvers. *Das, P., PROC 74 Dec* 1714-1716 (2A11)
angular resolution in conventional and synthetic aperture radar; dependence on sidelobe level. *Steinberg, Bernard D., PROC 74 Apr* 519-520 (2B03)
coherent radar images of extended targets; factors affecting image quality. *Mitchell, Richard L., PROC 74 Jun* 754-758 (2C03)
mapping and reconnaissance radar; angular resolution dependence on sidelobe level and target separation. *Steinberg, Bernard D., PROC 74 Jun* 758-762 (2C07)
Radar scattering
low-angle tracking over earth's surface; diffuse scattering theory. *Barton, David K., PROC 74 Jun* 687-704 (1C05)
turbulent irregularities; backscattering for rectangularly pulsed narrow-beam transmitted wave. *Valley, G. C., PROC 74 Mar* 401-402 (2D05)
Radar scattering; **cf.** Sea scatter
Radar signal processing
air-traffic control radar; clutter problems and performance improvement. *Muche, Charles E., PROC 74 Jun* 716-723 (1E06)
phased-array radar; acoustic surface-wave transducer array for phase scanning. *Tsai, Chen S., PROC 74 Jun* 863-864 (3E04)
Radar target recognition
birds; detection and identification of birds in flight using coherent and noncoherent radars. *Flock, Warren L., PROC 74 Jun* 745-753 (2B08)
Radar tracking
low-angle tracking over earth's surface; diffuse scattering theory. *Barton, David K., PROC 74 Jun* 687-704 (1C05)
Radiation detectors; **cf.** Infrared detectors; Ionization chambers; Millimeter-wave detectors; Pyroelectric detectors; Semiconductor radiation detectors

silicon metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)
Semiconductor device fabrication
CCD shift registers using Al-Al_2O_3-Al metallization; 500-bit registers. *Collins, D. R., PROC 74 Feb* 282-284 (2F01)
electron-beam semiconductor devices. *Silzars, Aris, PROC 74 Aug* 1119-1158 (2A01)
IMPATT oscillators; GaAs double-drift region diodes with p+-p-n-n+ structure; 21 GHz, 1.2 W of CW output power, 15.6% efficiency. *Migitaka, M., PROC 74 Jan* 141-142 (2E10)
MOSFET HCl processing; effect on low-frequency noise. *Cheng, Y. C., PROC 74 Jun* 859-860 (3D14)
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)
thin-film transistors using CdS_xSe_{1-x}. *Weng, Tung H., PROC 74 Oct* 1404 (2B02)
TRAPATT diodes; complementary Si n+-p-p+ diodes for *C*-band operation. *Ying, R. S., PROC 74 Feb* 287-288 (2F06)
ZnSe diodes; switching and memory effects in phosphorus-implanted ZnSe. *Shin, Bok-Kyoon, PROC 74 Apr* 538-540 (2C08)
Semiconductor device fabrication; **cf.** Ion implantation; Semiconductor doping
Semiconductor device measurements
gallium arsenide devices; minority carrier lifetime measurement. *Pence, Ira W., Jr., PROC 74 Jul* 1030-1031 (2F02)
noise; measurement of white and 1/*f* noise within burst noise. *Strasilla, Udo J., PROC 74 Dec* 1711-1713 (2A08)
silicon metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)
Semiconductor device modeling
bipolar transistors; characteristics generated from device process parameters. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)
Semiconductor device reliability
Bell System, 1950 to present. *Peck, D. Stewart, PROC 74 Feb* 185-211 (1D01)
electron-beam semiconductor devices. *Silzars, Aris, PROC 74 Aug* 1119-1158 (2A01)
factors affecting reliability, design, and process control factors; testing and screening procedures. *Peattie, C. Gordon, PROC 74 Feb* 149-168 (1A07)
life testing using thermally accelerated aging. *Reynolds, Frederick H., PROC 74 Feb* 212-222 (2A01)
small numbers of highly reliable devices; procurement methods. *Haythornthwaite, Raymond F., PROC 74 Feb* 260-273 (2D07)
special issue, *PROC 74 Feb* 147-276 (1A05)
special issue foreword. *Peck, D. Stewart, Guest ed., PROC 74 Feb* 147-148 (1A05)
underwater telephone cable repeaters. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)
US Department of Defense; standardization and specification approach. *Vaccaro, Joseph, PROC 74 Feb* 169-184 (1B13)
Semiconductor device reliability; **cf.** Integrated-circuit reliability
Semiconductor device testing
life testing using thermally accelerated aging. *Reynolds, Frederick H., PROC 74 Feb* 212-222 (2A01)
life validation tests for underwater telephone cable repeater devices. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)
reliability assurance for small numbers of highly reliable devices. *Haythornthwaite, Raymond F., PROC 74 Feb* 260-273 (2D07)
Semiconductor device testing; **cf.** Integrated-circuit testing
Semiconductor diode amplifiers; **cf.** IMPATT amplifiers; TRAPATT amplifiers
Semiconductor diode oscillators; **cf.** Gunn oscillators; IMPATT oscillators; LSA oscillators; Read diode oscillators; TRAPATT oscillators
Semiconductor diodes; **cf.** BARITT diodes; Electron-beam semiconductor devices; Gunn diodes; IMPATT diodes; Photodiodes; Step-recovery diodes; TRAPATT diodes
Semiconductor diode switches
GaAs bistable switches with current drop of 41.5% and switching time of 110 ps. *Izadpanah, S. H., PROC 74 Aug* 1166 (2D06)
polysilicon n-n+-n devices; breakover and negative resistance characteristics. *Muñoz, E., PROC 74 Oct* 1394-1395 (2A06)
ZnSe diodes, phosphorus-implanted. *Shin, Bok-Kyoon, PROC 74 Apr* 538-540 (2C08)
Semiconductor doping
GaAs IMPATT diodes with Read-type structure; dependence of efficiency on doping profile. *Hasegawa, F., PROC 74 May* 641-643 (2A07)
Semiconductor doping; **cf.** Ion implantation
Semiconductor irradiation effects
defect production. *Cheng, Li-Jen, PROC 74 Sep* 1208-1214 (1B12)
device degradation; hardening techniques. *Gregory, Bob L., PROC 74 Sep* 1264-1273 (1F12)
ionization effects; review of research problems. *Holmes-Siedle, Andrew G., PROC 74 Sep* 1196-1207 (1A14)
ionizing radiation effects at room temperature. *Schmidt, Paul F., PROC 74 Sep* 1220-1223 (1C10)
microwave diodes; bulk and junction transit-time diodes. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)
Si irradiated by neutrons; majority carrier removal rates and mobility degradation. *Colclaser, Roy A., PROC 74 Sep* 1232-1235 (1D08)
SiO_2 films on Si; degradation caused by plasma processing. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)
Semiconductor irradiation effects; **cf.** Ion implantation
Semiconductor lasers
charge storage under transient forward bias; effect on high-speed pulse modulation of laser. *Lee, T. P., PROC 74 Aug* 1176-1177 (2E02)
distributed-feedback lasers; transverse mode control. *Somekh, Sasson, PROC 74 Feb* 277-278 (2E10)
Semiconductor materials; **cf.** Gallium arsenide; Gallium arsenide phosphide; Germanium; Indium arsenide; Indium phosphide; Silicon; Zinc selenide
Semiconductor memories
ZnSe diodes, phosphorus-implanted. *Shin, Bok-Kyoon, PROC 74 Apr* 538-540 (2C08)
Semiconductor noise
GaAs FET noise figure in 0.5-4GHz range; effect of source lead inductance on noise figure. *Hadziasiou, A., PROC 74 Mar* 406-408 (2D10)
GaAs IMPATT diodes; noise measure improvement by increasing temperature. *Le Borgne, A., PROC 74 Apr* 535-537 (2C05)
measurement of white and 1/*f* noise within burst noise. *Strasilla, Udo J., PROC 74 Dec* 1711-1713 (2A08)
MOSFETs; low-frequency noise in HCl-processed MOSFETs. *Cheng, Y. C., PROC 74 Jun* 859-860 (3D14)
Semiconductor plasmas
SCRs; dielectric recovery function of breakdown plasma. *Bandopadhyaya, T. K., PROC 74 May* 648-649 (2A14)
Semiconductor radiation detectors; **cf.** Germanium radiation detectors
Semiconductor switches; **cf.** Semiconductor diode switches
Semiconductor thermal effects
bipolar transistor second breakdown; regions of intrinsic ionization in center of emitter and along its entire length. *Krishna, Surinder, PROC 74 Aug* 1182-1183 (2E08)
GaAs IMPATT diodes; noise measure improvement by increasing temperature. *Le Borgne, A., PROC 74 Apr* 535-537 (2C05)
IMPATT diodes; 80-GHz abrupt-junction diodes; optimum junction diameters. *Ohmori, M., PROC 74 Apr* 537-538 (2C07)
life testing of devices using thermally accelerated aging. *Reynolds, Frederick H., PROC 74 Feb* 212-222 (2A01)
Sensitivity analysis
time-domain network sensitivity; row sensitivity and column sensitivity. *Chandrashekar, M., PROC 74 Aug* 1179-1180 (2E05)
Shift registers; **cf.** Charge-coupled devices
Signal detection; **cf.** Optical signal detection
Signal estimation; **cf.** Estimation
Signal generators; **cf.** Waveform generators
Signal processing; **cf.** Digital signal processing; Optical signal processing
Silicon
radiation damage due to neutron bombardment; majority carrier removal rates and mobility degradation. *Colclaser, Roy A., PROC 74 Sep* 1232-1235 (1D08)
Silicon bipolar transistors
reliability requirements for underwater telephone cable repeater applications; life validation tests. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)
Silicon-controlled rectifiers; **cf.** Thyristors
Silicon devices
ion implantation; basic features and applications. *Lee, Don H., PROC 74 Sep* 1241-1257 (1E03)
metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)
polycrystalline n-n+-n devices; switching characteristics. *Muñoz, E., PROC 74 Oct* 1394-1395 (2A06)
radiation effects; hardening techniques. *Gregory, Bob L., PROC 74 Sep* 1264-1273 (1F12)
Silicon diodes
IMPATT diodes; ion-implanted double-drift *Ka*-band diodes. *Lee, D. H., PROC 74 Jul* 1025-1026 (2E11)
IMPATT oscillators; efficiency limitation due to instability effects. *van Iperen, B. B., PROC 74 Feb* 284-285 (2F03)
reliability requirements for underwater telephone cable repeater applications; life validation tests. *Miller, Lewis E., PROC 74 Feb* 230-244 (2B05)
TRAPATT diodes; complementary Si n+-p-p+ diodes for *C*-band operation. *Ying, R. S., PROC 74 Feb* 287-288 (2F06)
Silicon dioxide films
radiation-caused degradation due to plasma processing of devices. *McCaughan, Daniel V., PROC 74 Sep* 1236-1241 (1D12)
Silicon-on-sapphire circuits
distributed *RC* notch filters; voltage-tunable filter. *Wong, P. H. K., PROC 74 Apr* 523-524 (2B07)

♦ **Check author entry for later corrections/comments**

Silver films
longitudinal-strain coefficient of resistivity; calculation based on grain-boundary model. *Singh, Awatar, PROC 74 Apr* 524-526 (2B08)
Simulation; **cf.** Analog simulation; Computer-aided ...; Hybrid simulation
Skin effect
copper at 35 GHz and room temperature; anomalous skin effect. *Tischer, Frederick J., PROC 74 May* 635-636 (2A01)
Skylab
radar altimeter system; S-193 experiment. *McGoogan, Joseph T., PROC 74 Jun* 793-803 (2E14)
Slant transforms
Haar transforms' relation to slant Walsh transforms; fast algorithms. *Fino, Bernard J., PROC 74 May* 653-654 (2B05)
Slot arrays
on parabolic cylindrical surface; ray analysis of mutual coupling. *Shapira, Joseph, PROC 74 Nov* 1482-1492 (2A01)
Smoothing techniques
linear discrete-time systems; smoothing rate upper bound. *Kalata, Paul R., PROC 74 Sep* 1289-1290 (2A12)
Social considerations
power generation using coal; social costs. *Morgan, M. Granger, PROC 73 Oct* 1431-1442 (2B01) ♦
Social systems; **cf.** Environmental considerations; Urban systems
Software; **cf.** Computer software
Soil analysis
dielectric constant and conductivity as function of soil density, moisture, and excitation frequency from 30 MHz to 4 GHz. *Hipp, Jackie E., PROC 74 Jan* 98-103 (2B09)
moisture monitoring using implanted microwave sensors. *Birchak, J. Robert, PROC 74 Jan* 93-98 (2B04)
Solid-state plasmas; **cf.** Semiconductor plasmas
Solitons
on nonlinear dispersive transmission lines. *Kolosick, Joseph A., PROC 74 May* 578-581 (1C08)
TM soliton in nonlinear self-focusing media. *Miyagi, Mitsunobu, PROC 74 Sep* 1284-1285 (2A07)
Sounding; **cf.** Electromagnetic sounding
Soviet Union; **cf.** USSR
Space-vehicle radar
lunar surface and subsurface mapping using synthetic-aperture radar; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)
Space vehicles; **cf.** Satellites
Spatial filtering
optical methods. *Vander Lugt, Anthony, PROC 74 Oct* 1300-1319 (1A06)
Special issues
computer graphics, *PROC 74 Apr* 419-518 (1A05)
microwave applications in industry, science, and medicine, *PROC 74 Jan* 3-132 (1A05)
power industry applications of computers, *PROC 74 Jul* 868-1024 (1A06)
radar technology and applications, *PROC 74 Jun* 661-822 (1A07)
radiation effects in electronic materials, *PROC 74 Sep* 1188-1277 (1A06)
rays and beams, *PROC 74 Nov* 1412-1615 (1A06)
semiconductor device reliability, *PROC 74 Feb* 147-276 (1A05)
Spectral analysis
digital frequency mapping filters with time-varying parameters. *Terrell, P. M., PROC 74 Aug* 1165-1166 (2D05)
optical methods; one-dimensional and two-dimensional spectral analysis. *Vander Lugt, Anthony, PROC 74 Oct* 1300-1319 (1A06)
Spectral estimation
Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
Speech transmission
digital coding; PCM, DPCM, and delta modulation. *Jayant, Nuggehally S., PROC 74 May* 611-632 (1E13)
Stability
nonlinear systems; dichotomy theory. *Popov, V. M., PROC 74 May* 548-562 (1A06)
nonlinear system stability determination from linear system stability analysis; Kalman conjecture. *Fannin, D. Ronald, PROC 74 Apr* 542-543 (2C12)
nonlinear systems with periodic coefficients. *Venkatesh, Y. V., PROC 74 Feb* 278-279 (2E11)
Stability; **cf.** Asymptotic stability; Power system dynamic stability; Power system transient stability
Standards
integrated circuits for telephone equipment; specifications of British Post Office for bipolar digital circuits and MOS circuits. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)
Standards; **cf.** Military standards
State estimation
linear discrete-time systems; smoothing rate upper bound. *Kalata, Paul R., PROC 74 Sep* 1289-1290 (2A12)
State estimation; **cf.** Power system state estimation
Step-recovery diode circuits
pulse generators with high-speed variable repetition rate; maximum repetition rate of several gigahertz. *Coekin, J. A., PROC 74 Jun* 852-853 (3D07)
Stochastic processes
Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
Stochastic processes; **cf.** Gaussian processes
Stochastic signals
Rayleigh-distributed voltage recorded in decibels; mean, second moment, and variance. *Shepherd, William L., PROC 73 Dec* 1765-1766 (3B12) ♦
Stochastic signals; **cf.** Gaussian signals
Stratified media
beam scattering by nonuniform leaky-wave structures. *Saad, Abraham, PROC 74 Nov* 1552-1561 (2F01)
Striplines
waveguide mode suppression. *Schneider, Martin V., PROC 74 Aug* 1184 (2E10)
Submarine cables; **cf.** Underwater cables
Superconductivity
Nobel Prize for Physics for 1973 to Esaki, Giaever, and Josephson; preface to Nobel Lectures. *Gunn, J. B., PROC 74 Jun* 823-824 (2B06)
tunneling; Nobel Lecture for 1973. *Giaever, Ivar, PROC 74 Jun* 832-837 (2C01)
tunneling; Nobel Lecture for 1973. *Josephson, Brian David, PROC 74 Jun* 838-841 (2C07)
Superconductivity; **cf.** Josephson effect
Surface-scatter channels
random time-varying surface scattering; moment characterization of doubly-spread channels at high Rayleigh parameters. *McDonald, John F., PROC 74 Nov* 1606-1608 (3C08)
Surface-wave; **cf.** Magnetostatic surface waves
Surface-waves; **cf.** Acoustic surface waves; Electromagnetic surface waves
Surges; **cf.** Power system transients
Surveillance radar; **cf.** Air-traffic control radar
Switches; **cf.** Semiconductor diode switches; Semiconductor switches
Synchronization; **cf.** Carrier tracking loops
Synchronous generators
models for computer-aided system analysis. *Dandeno, Paul L., PROC 74 Jul* 941-950 (1F09)
Synthetic-aperture radar
angular resolution; dependence on sidelobe level. *Steinberg, Bernard D., PROC 74 Apr* 519-520 (2B03)
angular resolution; dependence on sidelobe level and target separation. *Steinberg, Bernard D., PROC 74 Jun* 758-762 (2C07)
lunar surface and subsurface mapping; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)
topographic mapping using synthetic-aperture radar with radar interferometry. *Graham, Leroy C., PROC 74 Jun* 763-768 (2C12)
Synthetic-aperture radar; **cf.** Hologram radar
System identification
linear time-invariant multivariable systems; transfer function matrix obtained from frequency response. *Shieh, Leang S., PROC 74 Aug* 1169-1171 (2D09)
linear time-invariant systems; Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
System modeling; **cf.** Power system modeling

T

Telephone cables; **cf.** Underwater telephone cables
Telephone equipment
integrated-circuit reliability; specifications of British Post Office for bipolar digital circuits and MOS circuits. *Reynolds, Frederick H., PROC 74 Feb* 223-230 (2A12)
Tellurium oxide devices
acoustooptic tunable filter using noncollinear interaction in TeO_2. *Uchida, Naoya, PROC 74 Sep* 1279-1280 (2A02)
Terrain mapping; **cf.** Topographic mapping
Testing; **cf.** Semiconductor device testing
Thermal effects; **cf.** Semiconductor thermal effects
Thin-film circuits
silicon metallization systems characterization using energetic ion backscattering. *Borders, James A., PROC 74 Sep* 1224-1231 (1C14)
Thin-film devices
fabrication of optical devices. *Smith, Henry I., PROC 74 Oct* 1361-1387 (1E01)
Thin films
silver films; longitudinal-strain coefficient of resistivity. *Singh, Awatar, PROC 74 Apr* 524-526 (2B08)
Thin-film transistors
CdS_xSe_{1-x} *transistors. Weng, Tung H., PROC 74 Oct* 1404 (2B02)
Thin-film waveguides
grating guide for integrated optics; plane-wave theory. *Fox, A. J., PROC 74 May* 644-645 (2A10)
optical dielectric waveguides; coupled-mode analysis, directional coupling, input–output coupling, modulation, and distributed-feedback laser sources. *Taylor, Henry F., PROC 74 Aug* 1044-1060 (1A06)
Thyristor motor controls
dc and ac drives; tutorial review paper. *Schieman, Robert G., PROC 74 Dec* 1643-1660 (1C01)
induction motor drives; thyristors in secondary side used as PWM dc switch. *Ray, Mita, PROC 74 Oct* 1397 (2A09)
Thyristors
breakdown plasma in SCRs; dielectric recovery function. *Bandopadhyaya, T. K., PROC 74 May* 648-649 (2A14)
diacs; polysilicon n-π-n devices; breakover and negative resistance characteristics. *Muñoz, E., PROC 74 Oct* 1394-1395 (2A06)
Time-delay systems
distributed lumped systems; optimal control with quadratic cost functional. *Kim, M., PROC 74 Aug* 1177-1179 (2E03)
Time-domain analysis
network sensitivity; row sensitivity and column sensitivity. *Chandrashekar, M., PROC 74 Aug* 1179-1180 (2E05)
Time-domain measurements
buried object detection and recognition; tuning of RF source through frequencies of nanosecond pulse spectrum, CW measurements, and computation of synthetic echo. *Robinson, Lloyd A., PROC 74 Jan* 36-44 (1C10)
Time series
Fourier analysis of stationary processes. *Brillinger, David R., PROC 74 Dec* 1628-1643 (1A14)
polynomial fit to sampled-data time series and updated at each new sample point with small memory. *Mengert, Peter, PROC 74 Apr* 543-544 (2C13)
Time-varying channels
surface-scatter channels; moment characterization of double-spread channels at high Rayleigh parameters. *McDonald, John F., PROC 74 Nov* 1606-1608 (3C08)
Time-varying filters
digital frequency mapping filters. *Terrell, P. M., PROC 74 Aug* 1165-1166 (2D05)
Time-varying linear discrete-time systems
smoothing rate upper bound. *Kalata, Paul R., PROC 74 Sep* 1289-1290 (2A12)

♦ **Check author entry for later corrections/comments**

Time-varying media
nonhomogeneous time-varying dispersive media; geometrical optics methods. *Kravtsov, Yu. A., PROC 74 Nov* 1492-1510 (2A11)
Topograhic mapping
lunar surface and subsurface mapping using synthetic-aperture radar; Apollo 17 Lunar Sounder Experiment. *Porcello, Leonard J., PROC 74 Jun* 769-783 (2D04)
Topographic mapping
Skylab radar altimetry; S-193 experiment. *McGoogan, Joseph T., PROC 74 Jun* 793-803 (2E14)
synthetic-aperture radar used with radar interferometry. *Graham, Leroy C., PROC 74 Jun* 763-768 (2C12)
Tracking filters
FM demodulation using dynamic tracking filters; bandwidth limit and threshold extension. *Pardue, B. H., PROC 74 May* 645-646 (2A11)
Tracking loops; **cf.** Carrier tracking loops; Phase-locked loops
Tracking radar; **cf.** Radar tracking

Transforms; **cf.** Discrete Fourier transforms; Fast Fourier transforms; Haar transforms; Hilbert transforms; Laplace transforms; Poisson transforms; Slant transforms; Walsh transforms
Transient analysis
bipolar transistor circuits; numerical Laplace inversion method used with piecewise-linear approximation technique. *Hajj, Ibrahim N., PROC 74 Mar* 408-410 (2D12)
Transient analysis; **cf.** Antenna transient analysis; Power system transients
Transient propagation; **cf.** Electromagnetic transient propagation
Transistors; **cf.** Analog transistors; Bipolar transistors; FETs; Microwave transistors; Power transistors; Thin-film transistors
Transmission lines
Lorentz transformation and transmission-line equations. *McCausland, Ian, PROC 74 Oct* 1398-1399 (2A10)
Transmission lines; **cf.** Nonlinear transmission lines; Striplines
Transportation; **cf.** Air transportation; Ground transportation; Road transportation
Transversely excited atmospheric lasers
molecular lasers; high-pressure pulsed lasers; recent developments. *Wood, Obert R., II, PROC 74 Mar* 355-397 (2A01)
TRAPATT amplifiers
pulsed microstrip amplifier for *X*-band. *Ho, P. T., PROC 74 Jul* 1029-1030 (2F01)
TRAPATT diodes
radiation effects. *Gutmann, Ronald J., PROC 74 Sep* 1256-1264 (1F04)
TRAPATT oscillators
complementary Si n^+-p-p^+ diodes for *C*-band. *Ying, R. S., PROC 74 Feb* 287-288 (2F06)
Traveling-wave amplifiers
parametric amplifiers; pulse saturation. *Schott, A. C., PROC 74 Dec* 1720-1721 (2B03)
Tsunamis
warning system based on ionospheric response to Rayleigh wave generated by earthquake. *Najita, Kautoshi, PROC 74 May* 563-567 (1B07)
Tunable filters
acoustooptic filter using noncollinear interaction in TeO_2. *Uchida, Naoya, PROC 74 Sep* 1279-1280 (2A02)
distributed *RC* notch filters; voltage-tunable filter suitable for silicon-on-sapphire realization. *Wong, P. H. K., PROC 74 Apr* 523-524 (2B07)
Tunnel-diode circuits
comparator consisting of tunnel diode and balanced four-transistor isolating amplifier; 800-MHz operation. *Griffiths, B., PROC 74 May* 639-640 (2A05)
Tunneling
Nobel Prize for Physics for 1973 to Esaki, Giaever, and Josephson; preface to Nobel Lectures. *Gunn, J. B., PROC 74 Jun* 823-824 (2B06)
semiconductor junctions; Nobel Lecture for 1973. *Esaki, Leo, PROC 74 Jun* 825-831 (2B08)
superconductors; Nobel Lecture för 1973. *Giaever, Ivar, PROC 74 Jun* 832-837 (2C01)
superconductors; Nobel Lecture for 1973. *Josephson, Brian David, PROC 74 Jun* 838-841 (2C07)
Turbulent media
electromagnetic waves in turbulent air; phenomenological model. *De Wolf, David A., PROC 74 Nov* 1523-1529 (2C14)
laser-beam focusing; effect of turbulence on intensity distribution in focal plane of focused beam. *Fante, Ronald L., PROC 74 Oct* 1400-1402 (2A12)
laser-beam propagation in atmospheric turbulence; mutual coherence function. *Fante, Ronald L., PROC 74 Nov* 1604-1605 (2C06)
scattering by turbulent irregularities; backscattering for rectangularly pulsed narrow-beam transmitted wave. *Valley, G. C., PROC 74 Mar* 401-402 (2D05)
Two-dimensional digital signal processing; **cf.** Digital image processing
Two-port networks
Lorentz transformation and symmetrical two-port equations. *McCausland, Ian, PROC 74 Oct* 1398-1399 (2A10)

U

Ultrasonic applications; **cf.** Biomedical ultrasonics
Ultrasonic imaging; **cf.** Acoustic imaging
Ultrasonic transducers
Mn–Zn ferrite crystal carrying electric current; deformation due to magnetostriction. *Ogawa, Tomoya, PROC 74 Jan* 140-141 (2E09)
Underwater acoustic propagation
surface-scatter channels; moment characterization of double-spread channels at high Rayleigh parameters. *McDonald, John F., PROC 74 Nov* 1606-1608 (3C08)
Underwater communications
ELF communications. *Bernstein, Steven L., PROC 74 Mar* 292-312 (1A06)

Volterra series
nonlinear system response to multiple inputs. *Bussgang, Julian J., PROC 74 Aug* 1088-1119 (1D08)
VSB
abbr. of Vestigial-sideband
VSB-AM
signal representation in time domain. *Hill, F. S., Jr., PROC 74 Jul* 1032-1033 (2F04)

W

Walsh series
truncation and roundoff errors; comparison with Fourier series. *Blachman, Nelson M., PROC 74 Mar* 346-354 (1E04)
Walsh transforms
dyadic-invariant linear system analysis; sampled output in response to sampled input. *Cheng, David K., PROC 74 Jul* 1038-1040 (2F10)
slant Haar transforms; relation to slant Walsh transforms; fast algorithm. *Fino, Bernard J., PROC 74 May* 653-654 (2B05)
Wave diffraction; **cf.** Electromagnetic diffraction
Waveform generators
digital sine wave generators; digital oscillator having unique limit cycle independent of initial conditions. *Corinthios, M. J., PROC 74 Jan* 138-139 (2E07)
radar ambiguity function generator using acoustic surface-wave convolvers. *Das, P., PROC 74 Dec* 1714-1716 (2A11)
Waveguide discontinuities
open-ended parallel-plate guides; TE mode reflection; ray-optical approach. *Boersma, John, PROC 74 Nov* 1475-1481 (1E13)
Waveguide lasers
distributed-feedback semiconductor lasers; transverse mode control. *Somekh, Sasson, PROC 74 Feb* 277-278 (2E10)
Waveguides; **cf.** Dielectric waveguides; Electromagnetic surface waveguides; Fiber waveguides; Helical waveguides; Optical waveguides; Thin-film waveguides
Wave propagation; **cf.** Acoustic propagation; Electromagnetic propagation; Nonlinear wave propagation; Optical propagation; Radiowave propagation
Wave scattering; **cf.** Electromagnetic scattering, Radar scattering
Weather; **cf.** Meteorology
Wedges
diffraction by edge in curved conducting surface; geometrical diffraction theory. *Kouyoumjian, Robert G., PROC 74 Nov* 1448-1461 (1C14)
diffraction in media with one and two propagation constants; geometrical diffraction theory. *Christiansen, Peter L., PROC 74 Nov* 1462-1468 (1D14)
Western Europe
computer graphics; software, hardware, applications. *Guedj, Richard A., PROC 74 Apr* 421-428 (1A07)
Wien networks
tapered and inverted Wien networks; source impedance compensation. *Ganguly, Udaya S., PROC 74 Jan* 136-137 (2E05)
Winds
HF over-the-horizon radar to measure ocean surface conditions; wind vector determination. *Ahearn, John L., PROC 74 Jun* 681-687 (1B13)

X

X-ray radiation effects
metals and dielectrics; induced charge transfer and surface emission. *Barlett, Robert H., PROC 74 Sep* 1215-1220 (1C05)

Z

Zinc selenide devices
switching and memory effects in phosphorus-implanted ZnSe. *Shin, Bok-Kyoon, PROC 74 Apr* 538-540 (2C08)

Vol. 62
